CATIE ACITELLI

◇ Course Evaluations ◇

Over the course of my graduate career, I have been the instructor of record for a number of courses. The courses are listed in Table 1.

MA 121	Elements of Calculus
MA 231	Calculus for Life & Management Sciences B
MA 405	Introduction to Linear Algebra

Table 1: Courses Taught

Quantitative Data

Students were presented with the following 8 statements and asked to mark their level of agreement from 1 to 5, with 5 being the highest.

1. The instructor's teaching aligned with the courses learning objectives/outcomes.
2. The instructor was receptive to students outside the classroom.
3. The instructor explained material well.
4. The instructor was enthusiastic about teaching the course.
5. The instructor was prepared for class.
6. The instructor gave useful feedback.
7. The instructor consistently treated students with respect.
8. Overall, the instructor was an effective teacher.

Table 2 below shows the average student response values, where available, for courses in which I was the instructor of record.

	1	2	3	4	5	6	7	8
MA 231 (Summer 2 2021)	4.9	5.0	5.0	5.0	5.0	5.0	5.0	5.0
MA 231 (Summer 1 2021)	4.9	5.0	4.9	5.0	5.0	4.6	4.9	5.0
MA 405† (Fall 2020)	4.4	4.5	3.9	4.4	4.5	4.5	4.6	4.2
MA 121 (Fall 2019)	4.7	4.7	4.4	4.7	4.8	4.5	4.7	4.6
MA 231 (Summer 2 2019)	5.0	5.0	5.0	5.0	5.0	5.0	5.0	5.0

Table 2: Quantitative Course Evaluation Data

†Course videos from another instructor.

Qualitative Data

Table 3 below shows selected student written evaluations for classes in which I was the instructor of record.

MA 231 (Summer 2 2021)	"Catie Acitelli is an exceptional instructor who creates a connection with her students in a way that made them feel comfortable asking questions and reaching out during office hours. Even virtually, this teacher conveyed the material in a comprehensible way that prepared us well for quizzes, tests, and overall comprehension. I have never found myself looking forward to a 9:50 AM math class until I took MA 231 with Catie Acitelli." "Catie was extremely well organized in her teaching for this course; during the daily lectures, her utilization of color-coordinated notes was incredibly useful. During office hours she was helpful and made the information more palatable for me. She was quick and thorough in responding to emails regarding homework questions."
MA 231 (Summer 1 2021)	"She was an excellent instructor overall. Not only did she explain material in a way that I was able to understand, but if a student had trouble understanding, she would show us several ways to do certain problems. She was always able to finish teaching us that material for each day,and very rarely did we get off schedule (when we did get off schedule, we quickly caught up). Although the course was fast, she was able to teach us the material effectively, and she was always willing to communicate with us (on zoom or via email) to ensure that we were understanding our assignments. She also went out of her way to accommodate to us students, to make sure that we were able to not only learn material, but enjoy learning the material, and enjoy going to class as well. Before I had her, I struggled to understand calculus, but I went through this class easily thanks to her. Wonderful instructor overall."
MA 405 (Spring 2021)	"Catie is a great instructor who obviously very much cares about the art of teaching and inspiring a love of mathematics in her students. She spends a lot of time improving and workshopping her lectures and comes prepared, but is always able to adapt and respond to the needs of her students during class. I hope other non-math students get to take her class for linear algebra" "The course was extremely well thought out, from the lectures, to the supplemental videos posted, to the weekly quizzes, and in-class polls. Catie did an amazing job teaching this course, making sure that all the students understood where each theorem came from and making sure to clearly explain each concept."
MA 405† (Fall 2020)	"Professor Acitelli is a wonderful instructor overall. She provides excellent study guides and practice problems, and the office hours are always very helpful. She is patient and friendly. I hope she could use more of her own teaching in this course instead of using the videos from other professors."

MA 121 (Summer 2020)	"Although this was an online course, I was thoroughly pleased with the course content and how it was delivered. The lecture videos were previously recorded but I still felt as though I was apart of the class when watching from home. I recall having a couple questions about a WebAssign homework and Ms. Acitelli provided me with multiple pages of handwritten answers and wrote out steps for each part of the problem. I truly appreciate her willingness to ensure each student's mental health and wellbeing are cared for especially during the time that this course took place. This class completed my math requirements but I would love to have her as a professor again." "Even though this was an online class I felt that Catie made a strong effort to support all of her students and create a connection with all of us throughout the course. Instead of just posting the material online she kept in contact with us by sending emails multiple times a week about class information, and just to make sure that all of us were ok. I never felt embarrassed to ask a question or send an email about anything during the class. She did a very nice job of making an online summer course very doable and did her best to make it enjoyable."
MA 121 - 001* (Spring 2020)	"Did a great job communicating to the class as we switched professors midway through the semester. She continued to teach the class on the same schedule as before. She didn't change the original syllabus, which I very much appreciated. Very accessible via email and always willing to help. Very caring and nice." "After Spring Break the instructor done an excellent job of covering material that was needed to learn. Math has never been a strong subject for myself, and by watching the lecture videos I felt like the subject of calculus became easy. The instructor also made a good decision to allow the testing windows to be open for a whole day for somebody like me who had a very busy schedule before the online learning process, which only got more hectic after spring break." "Ms. Acitelli has been a great calc professor! She ran the course after spring break and it was wonderful. She communciated with us often about what videos to watch and which assignments to complete. The videos were easy to understand and I learned a lot from them."
MA 121 - 003* (Spring 2020)	"Did a great job communicating to the class as we switched professors midway through the semester. She continued to teach the class on the same schedule as before. She didn't change the original syllabus, which I very much appreciated. Very accessible via email and always willing to help. Very caring and nice."
MA 121 (Fall 2019)	"Funny, always enthusiastic, always provides quick responses to questions through email, always available at office hours, fantastic instructor (this is from someone who has always struggled in math), she definitely knows how to TEACH instead of TELL students how to do math."

	"The resources provided are easily accessible and helpful, especially the class videos. Our class is in the late afternoon and being able to rewatch parts of the lecture have helped me tremendously in a deeper level of understanding of the material. I have never taken calculus and I have been able to learn a ton." "Everything in this class taught by Catie was well explained, multiple examples of all difficulty were given, clearly written, and just made so much simpler. She's one of those great teachers that doesn't confuse you with inapplicable information, she teaches what you need to know. As a hater of math, I enjoyed coming to this class most days, and even found it interesting. She made calculus, an impossible subject for me, both easy to understand and fun to do."
MA 231 (Summer 2 2019)	"She is probably one of the most productive and BEST professors I have ever had... and she is only a Grad student (though her teaching in HS has helped her a lot understand kids and how a class is run). She is always willing to work with you, doesn't make you feel dumb when you don;t understand, is always in office hours willing to help, and is very sweet and repeatable to things you have going on. Wish I took all my classes with her and not just my last one." "Catie Acitelli is a very gifted and enthusiastic teacher. She was excellent at explaining the reasoning behind each mathematical process. Every time she taught a new topic, she was able to give step-by-step instructions to solve every problem within that topic. This made it very helpful for the students to look at a math problem and understand what the problem is asking and what they need to do to solve it."

Table 3: Qualitative Written Course Evaluations

†Course videos from another instructor.
*Instructor of Record post-COVID only.

The content that follows is a collection of all quantitative and qualitative course evaluations available for courses in which I have been the instructor of record or teaching assistant. It is worth noting again that the Fall 2020 MA 405 course used prerecorded videos from another instructor, and course evaluations may reflect that. Additionally, I inherited both of another instructor's Spring 2020 MA 121 classes at the start of the pandemic.

The most common critique from students is that I write too fast on the board or screen. When providing notes, I try to write down everything I say, so that my class is more accessible and my notes can stand alone. I also aim to provide a plethora of examples during class, and I recognize that the writing may seem quick. To counter this, I have begun providing guided notes prior to class time so that students can follow along and not have to worry about writing down every problem or statement. I also post the completed notes from class with the recorded lecture on our course website after the fact.

2. Results from cross-listed courses are included in the mean for the department whose course prefix appears first in the alphabet (e.g., for a course listed as HI and REL, the results are included in History's mean). To find the department mean for the other department (in this example, Philosophy and Religion), go to http://www2.acs.ncsu.edu/UPA/classeval/faculty/college_univ_means.htm .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Calc Life Manag B
Term: 2021 Sum2	MA 231 001 Courses surveyed - MA 231 001
Question	**Response**
Comment on strengths and weaknesses of the instructor	The instructor explained and formatted the lessons very well. This was the first time I've had a professor truly go above and beyond the book explanation, and took the time to color code and organize her lessons. Ms. Catie is a great professor who really cares about her students! The only critique I have is that she is a quick writer, and I kind of struggle writing all of the math down.
Comment on strengths and weaknesses of the course	I usually am average at math, and this course I really excelled due to Ms. Catie. She is nice and very encouraging in her lessons which is formatted very well despite the fast summer pace. This is intended to be my last math course, and I truly am so happy I chose to take Ms. Catie's summer Calc 2 class. Although a fast pace, the work load was manageable and fair.
Give suggestions on how the course or how the instruction could be improved.	Overall, the course taught me the math straightforward and I learned a lot. The only suggestion I could give is to slow down the writing speed, because I sometimes cannot keep up. However, all said I really enjoyed this course!
--------	--------
Give suggestions on how the course or how the instruction could be improved.	She was very very flexible with my schedule for work, considering I often work night shifts and this is a morning class; she was willing to change test dates and give reasonable extensions on quizzes! The information and notes were extremely well organized and color-coded, and as someone who absolutely needs organization to properly comprehend information it was fantastic to not have to guess at any processes or steps for problems. The recorded lectures were done very well and helped me and anyone else who couldn't always make it to the live lectures. The course itself was extremely manageable, especially for a 5 week course. The schedule was set and fair and I didn't feel overworked at all. The grading policy was great. Honest to God I can't think of any weaknesses or things I wish she'd done better. Catie Acitelli is the best math teacher I've ever had.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie Acitelli is an exceptional instructor who creates a connection with her students in a way that made them feel comfortable asking questions and reaching out during office hours. Even virtually, this teacher conveyed the material in a comprehensible way that prepared us well for quizzes, tests, and overall comprehension. I have never found myself looking forward to a 9:50 AM math class until I took MA 231 with Catie Acitelli.
Comment on strengths and weaknesses of the course	This class was graded in a way that accounted for errors and helped me to understand that though an equation (for the most part) has a definite solution and answer, my grade wouldn't be detrimentally harmed if I mixed up a number while doing everything else correctly.
Give suggestions on how the course or how the instruction could be improved.	Having this course in five weeks over a computer was challenging, but that was a choice made by NCSU during COVID.

--------	--------
Comment on strengths and weaknesses of the instructor	Catie was extremely well organized in her teaching for this course; during the daily lectures, her utilization of color-coordinated notes was incredibly useful. During office hours she was helpful and made the information more palatable for me. She was quick and thorough in responding to emails regarding homework questions.
Comment on strengths and weaknesses of the course	I really only utilized her Zoom lectures and reviewed class notes to check my work throughout this course. The tests were fair, however, though I attended a 5-week session, the third test was, in my opinion, rushed, and I felt considerably less prepared for that exam compared to all of the others. Other than that, the structure and instruction in this class were extremely palatable for a student who is not confident in their mathematic ability.
Give suggestions on how the course or how the instruction could be improved.	Due to the lack of recitation offered for this five-week course, I would recommend continuing to offer office hours and review sessions prior to the exams, as they assist those students trying t become more comfortable with the material. The structure and organization of this class were superb, and the instruction was consistently easily comprehendible.
--------	--------
Comment on strengths and weaknesses of the instructor	She was able to explain topics in a multitude of ways to help assist students with different learning skills. She always provided exceptional feedback on our questions and maybe sure we had an adequate amount of practice before proceeding into the next topic. Overall, Prof. Acitelli was an excellent instructor
Give suggestions on how the course or how the instruction could be improved.	In my personal opinion, Catie Acitelli was beyond an exceptional instructor. I have no complaints or suggestions for her to improve on. Of all the countless math courses I have had to take I have never enjoyed learning the subject until attending Ms. Acitelli's.
--------	--------
Comment on strengths and weaknesses of the instructor	Very well organized class structure and clear teaching.I appreciate the awareness of the timing and pace for note-taking, allowing us time between steps. The guided notes were incredibly helpful and I feel more successful in this math class than any other. Excellent teaching style.
Comment on strengths and weaknesses of the course	In class material was very clear, tests were on the material we learned. The only weakness I would say is that sometimes the webassign questions were confusing, or presented slightly different than what we practiced in class, or just were very particular about exactly how an answer was typed in.
Give suggestions on how the course or how the instruction could be improved.	Maybe some additional notes on webassign if an answer needs to be in fraction form vs. decimal, etc.
--------	--------
Comment on strengths and weaknesses of the instructor	Prepared and organized long classes made it hard to maintain focus when adding new material in the last couple minutes of class
--------	--------
Comment on strengths and weaknesses of the instructor	I feel that our professor was always prepared and truly cared about how we did and if we understood the material

Give suggestions on how the course or how the instruction could be improved.	I feel that this class is represented what a true math course should be and all of the aids provided helped me out a lot
--------	--------
Comment on strengths and weaknesses of the instructor	I really liked the teaching style of the instructor. She made things easy and efficient to learn!
Give suggestions on how the course or how the instruction could be improved.	I really liked this class!
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was an excellent teacher that cared for the students and wanted us to learn and understand what is going on. She used different colors that correspond thought the problems and this is something that allowed me to see where certain answers were gotten when looking back over the notes.
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths - Explained material super well, I had a positive experience and learned a lot. I enjoyed doing the poll questions. You gave many great resources and tools for us to use, I thought all the videos and notes you posted helped me a ton. Thank you for being reasonable and reliable when it came to things such as answering emails or extensions. Weakness - You still wrote a bit too fast, which is okay because I can catch up but I don't think other students can.
Comment on strengths and weaknesses of the course	Strengths - Course assignments like WebAssign and the weekly quizzes aligned well with the exams that were given to us. I like how the assignments you gave us were fair and were nothing lengthy or extra. Weaknesses - None.
Give suggestions on how the course or how the instruction could be improved.	None! I enjoyed having you as my professor and I hope you get tenure.
--------	--------
Comment on strengths and weaknesses of the instructor	She is very considerate and understanding. Whenever anyone had a question about the material, she was always more than happy to help clarify anything. She also had a great attitude and would make comments every now and then that made me laugh.
Comment on strengths and weaknesses of the course	The homework and quizzes were really helpful and fair.
--------	--------
Comment on strengths and weaknesses of the instructor	Professor Acitelli was the best math professor I have had. She explained the course materials thoroughly and effectively. It was clear that she cared for each of her students and I wish I had the chance to take her class in person.
Comment on strengths and weaknesses of the course	The course structure was well organized and easy to understand.
Give suggestions on how the course or how the instruction could be improved.	Somehow I was unable to see the course when logging into moodle. I could only access the moodle page when logging in through WolfWare.
--------	--------
Comment on strengths and weaknesses of the instructor	Extremely good teacher!!

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Calc Life Manag B
Term: 2021 Sum1	MA 231 001 Courses surveyed - MA 231 001
Question	**Response**
Comment on strengths and weaknesses of the instructor	Professor took time to create extra methods of study and to ensure we sufficiently understood the material.
Comment on strengths and weaknesses of the course	There was plenty opportunity to get extra practice which helped understand material better.
--------	--------
Comment on strengths and weaknesses of the instructor	It was definitely a huge strength that this professor listened to the students and catered to their needs, whether that meant providing extra resources or being flexible towards our due dates. She was also always enthusiastic which made a 9:50 am class more enjoyable. The only "weakness" per se is that she would write or talk quickly here and there, however, when we addressed this she would automatically slow down or give us time to catch up.
Comment on strengths and weaknesses of the course	This course rocked! I would 10/10 take it again (even though I wouldn't want to repeat a class). The amount of material we were able to cover in 5 weeks is incredible, and all objectives were covered while still having an enjoyable time.
Give suggestions on how the course or how the instruction could be improved.	I cannot speak for everyone since I took this class immediately after taking 131, but for the students that had not, I would recommend a longer review time. I think a lot of my success in this course was due to the material from 131 being super fresh in my mind.
--------	--------
Comment on strengths and weaknesses of the instructor	She was literally the best in the whole wide world. She genuinely loves math and is THE best math teacher I have ever had. She was incredibly organized and I never had trouble following her steps or finding the material I needed. She also made sure to write everything down which I really appreciated so when I would go back to look at the notes they were easy to follow. She really had the student in mind at all times.
Comment on strengths and weaknesses of the course	The course was pretty great, really fast-paced but Catie made it easy to keep up and stay engaged.
Give suggestions on how the course or how the instruction could be improved.	No suggestions other than keeping Catie because she is the best in the whole world.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli really enjoys teaching, which was evident in how the class was constructed and how material was presented. It was enjoyable to take the class with an instructor who really cared about how the material was taught and wanted to make sure that everything was understood, which is not something that a lot of math professors do.
Comment on strengths and weaknesses of the course	The course moved extremely fast, which was to be expected with it taking place over Summer. That being said, I did not feel like I got behind at all despite the rapid pace, as all of the material proved to be continuous and nothing came out of left field between exams.

Give suggestions on how the course or how the instruction could be improved.	There were a lot of similarities to Math 131 here, which I found beneficial in regards to subject material continuity. The last week of instruction had both the final exam and the last test in a span of a few days, so the timeline towards the end of the course was relatively tight. As such, solutions for that last exam are not yet available and the final exam is in less than 48 hours. This is not a complaint or a knock on the instructor, but just an example of how the timeline is not forgiving towards the end of the course.
--------	--------
Comment on strengths and weaknesses of the instructor	She was an excellent instructor overall. Not only did she explain material in a way that I was able to understand, but if a student had trouble understanding, she would show us several ways to do certain problems. She was always able to finish teaching us that material for each day, and very rarely did we get off schedule (when we did get off schedule, we quickly caught up). Although the course was fast, she was able to teach us the material effectively, and she was always willing to communicate with us (on zoom or via email) to ensure that we were understanding our assignments. She also went out of her way to accommodate to us students, to make sure that we were able to not only learn material, but enjoy learning the material, and enjoy going to class as well. Before I had her, I struggled to understand calculus, but I went through this class easily thanks to her. Wonderful instructor overall.
Comment on strengths and weaknesses of the course	This course was really helpful for me, considering I struggled with calculus previously. The quizzes, and review guides I was provided really helped me get a grip of the information, and the in-class practice problems and poll questions were also great resources. I also really liked how the course was set up in a way that it was genuinely building off of previous knowledge. Every topic we learned built off of the topic we learned prior to it. In previous courses, such as chemistry, or even my last calculus class, the material seemed scattered, so this course was very refreshing for me.
Give suggestions on how the course or how the instruction could be improved.	With the way this course was set up, and with this specific instructor, I dont really see that there could be much improvement (it is already great!). However, I would probably just ask that the tests were shortened, since we only have an hour and thirty minutes (the class time) to take each test, I would recommend that the tests were slightly shortened so as to ensure that everyone gets a chance to finish.
--------	--------
Comment on strengths and weaknesses of the instructor	The instructor was always eager to stay after class for students with questions and responded to email questions quickly! She also used color as a teaching aid to help us better understand different components of things we were learning. You can tell Catie is very passionate about math and that she truly loves it and it makes the class so much more interesting! She is so friendly and cares about her students. As a zoom student, it was her enthusiasm and student connection that made me keep my camera on during every class, despite the temptation of going camera free. Catie has been one of my favorite teachers thus far in my college career!

Comment on strengths and weaknesses of the course	For a summer course, the material in this class was spread out well and I never felt rushed! With a relatively short homework assignment related to each module, I was able to learn in lecture in the morning and complete the homework on that material in the afternoon, which helped me digest the material!
Give suggestions on how the course or how the instruction could be improved.	I do not have any suggestions, the class was great!
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Catie was very good teacher and she expains so good.
Comment on strengths and weaknesses of the course	Everything is good and they were so helpful.
Give suggestions on how the course or how the instruction could be improved.	I think the algebra was little hard and examples was difficult. I think examples work for 16 weeks semster .My suggestion will be to make the examples little easy due to short time in the summer .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Linear Algebra

Question	**Response**
Please comment on the strengths of the course and instructor.	Great professor who really helped out multiple times in office hours. Extremely nice and informative for any questions we had, even if they were out of the scope of the class
Please comment on the weaknesses of the course and instructor.	Not a fan of the part 2s of the tests and the graded assignments. I just found myself spending an extremely longer amount of time on those than the normal homework/material. I understand the need for these types of tests in this semester but I'd hope if I had taken this class in a normal semester there would have been less of this type of assignment.
To help other students in the future and enhance student success, what could be improved in the course?	Not much, thanks for being a great professor this semester
--------	--------
Please comment on the strengths of the course and instructor.	Great instructor and very understanding. Great teacher as well.
Please comment on the weaknesses of the course and instructor.	There were times where I did not understand where the questions were coming from in the material.
To help other students in the future and enhance student success, what could be improved in the course?	Match the written part of the test questions closer to in class examples.
--------	--------
Please comment on the strengths of the course and instructor.	Really approachable, good enthusiasm. I enjoyed the polls, tests were fair, I liked the note outlines, review outlines, weekly quizzes, and I appreciated the WebWorks as well.
To help other students in the future and enhance student success, what could be improved in the course?	Making things due Sunday night is *okay* but I very religiously observe that as a day of worship and often found that Sunday night deadlines stressed me out. Partially as a result of my own forgetting to start on Saturday mentality as well.
--------	--------
Please comment on the strengths of the course and instructor.	Instructure was super enthusiastic and made the topic interesting. The course was VERY well organized which was super helpful, especially during a pandemic. In addition, the due dates were very regular which helped with keeping track of assignments. I also really liked having notes that I could follow along during the lecture.
Please comment on the weaknesses of the course and instructor.	Sometimes it's hard to keep up during the class. Especially with the amount of writing, if I'm behind on my writing it's hard to focus on what the instructor is saying, and then I feel behind for the rest of the lecture. Luckily the lecture videos are available if I need to review certain sections.
To help other students in the future and enhance student success, what could be improved in the course?	I think having slightly more written in the notes may be helpful. I do taking notes during the lecture, it keeps me engaged, but maybe some portions could be more fill in the blank rather than writing out everything.
--------	--------

Please comment on the strengths of the course and instructor.	Catie is very easy to talk to and makes the overall class experience positive and relaxing. She's great at explaining to make weird concepts seem intuitive. I liked the overall structure of the class where graded assignments helped with proof writing and the homework allowed us to practice problem solving. One of the best teachers I've ever had
To help other students in the future and enhance student success, what could be improved in the course?	The course couldn't have been better
--------	--------
Please comment on the strengths of the course and instructor.	Catie Acitelli is a fantastic instructor. She is very helpful and responsive. I always felt like I could reach out to her. It was obvious that our understanding was important to her and she always made an effort to understand how we were doing. And unlike other math courses, the homeworks are reasonable and actually always relate to what we cover in class.
--------	--------
Please comment on the strengths of the course and instructor.	I loved this course! I have never had a math class at NC State where my instructor has provided as much detail or supports as Catie did in our class. I appreciated how she provided extensions for assignments when needed. I feel that she actually cares about our health and well-being as students. Great class!
Please comment on the weaknesses of the course and instructor.	I can't think of any weaknesses.
To help other students in the future and enhance student success, what could be improved in the course?	I truly can't think of anything to be improved in the course. Maybe more polls to allow students to reflect on the content in class.
--------	--------
Please comment on the strengths of the course and instructor.	Catie is a great instructor who obviously very much cares about the art of teaching and inspiring a love of mathematics in her students. She spends a lot of time improving and workshopping her lectures and comes prepared, but is always able to adapt and respond to the needs of her students during class. I hope other non-math students get to take her class for linear algebra and/or the department takes her curriculum and makes other instructors to use it.
Please comment on the weaknesses of the course and instructor.	She writes kind of fast, but thats not really her fault, mostly just because I'm slow at taking notes during class. She uploads her lecture notes so its not really an issue.
To help other students in the future and enhance student success, what could be improved in the course?	Nothing, the class is great and Catie should be the only person allowed to ever teach it.
--------	--------
Please comment on the strengths of the course and instructor.	The course was extremely well thought out, from the lectures, to the supplemental videos posted, to the weekly quizzes, and in-class polls. Catie did an amazing job teaching this course, making sure that all the students understood where each theorem came from and making sure to clearly explain each concept.
Please comment on the weaknesses of the course and instructor.	As a student, it's always a little concerning when new material is presented on a test, even if it does relate to things that have been done in class. Despite this, I understand the need for challenging questions to truly test our knowledge.

To help other students in the future and enhance student success, what could be improved in the course?	The webwork may cover the material but it doesn't exactly fit into the course. The supplemental practice sheets did a much better job helping me identify what I know and what I needed to go back and learn.
--------	--------
Please comment on the strengths of the course and instructor.	I think this was a really interesting course with a great instructor. She explained things thoroughly and I really enjoyed the polls to check for understanding. I like they she asked for our input and tailored to what we needed. She is very flexible and I really enjoyed the class because of the instructor. I also liked having two parts to the test and I think that helped my grade, as well as the quizzes.
Please comment on the weaknesses of the course and instructor.	I think the tests and homework were a lot harder than the examples and it could get overwhelming. I would feel really prepared before the test and then open it and become confused with a lot of the questions on there.
--------	--------
Please comment on the strengths of the course and instructor.	Awesome teacher and course. Catie took the time to explain things thoroughly, answer questions, go through examples, etc. The course moodle page was great, very organized with tons of practice problems, notes, videos, everything you need to learn. The class was a lot of work but it helped me learn. Tests were fair especially with the extra credit. Office hours were always helpful.
To help other students in the future and enhance student success, what could be improved in the course?	Nothing
--------	--------
Please comment on the strengths of the course and instructor.	she is very knowledgable on the material. I have no doubts she knows what she's doing. she is really quick to answer emails and gives help in a way that you know how to do the problem again in the future. very helpful. great attitude.
Please comment on the weaknesses of the course and instructor.	sometimes goes a little fast, so just needs to slow down especially with harder materials. that kinda happens when professor forget how hard learning the material was at first
To help other students in the future and enhance student success, what could be improved in the course?	the supplemental information was great and it would help a lot if that stuff was incorporated into teaching the material. kind of dumbing it down a little.
--------	--------
Please comment on the strengths of the course and instructor.	This course I'd say has the strength of really breaking down the linear algebra into understandable concepts. Professor Acitelli really did a good job of making concept intuitive.
Please comment on the weaknesses of the course and instructor.	Professor Acitelli has been one the better Professors I've had for any math class I've taken. If I had to give a weakness of the course, and maybe this reflects more on my understanding. It would be that linear transformations relating to polynomials spaces and and other non vector spaces aren't explained that well.
To help other students in the future and enhance student success, what could be improved in the course?	I don't think I can offer much advice on how to improve the course. Perhaps giving more written assignments that would give more feedback on proofs and the logic involved with them would be beneficial.
--------	--------

Please comment on the strengths of the course and instructor.	Good explanations, considerate of students, balanced workload. I appreciate the setup of her tests.
Please comment on the weaknesses of the course and instructor.	I appreciate having so many resources to use, but it can also be overwhelming at times, and many of the textbooks reiterate the same explanations of concepts. I do not think you should do away with using multiple resources, but perhaps narrow them down.
To help other students in the future and enhance student success, what could be improved in the course?	MA405 is taken by students from a variety of majors, and while some may have experience writing mathematical proofs, others may not. I think it would be helpful to communicate clearly with students what you expect from their proofs, keeping in mind that some may have never read mathematical proofs. I understand that MA405 is not a class solely devoted to proof-writing, which is why providing students with resources and expectations may help them navigate the process better.
--------	--------
Please comment on the strengths of the course and instructor.	Great!
Please comment on the weaknesses of the course and instructor.	Nope
To help other students in the future and enhance student success, what could be improved in the course?	Nothing, everything is perfect
--------	--------
Please comment on the strengths of the course and instructor.	I loved her approach to teaching, leaving out antiquated ideals of the past generation instead of hold traditions to standard values our learning above all else.
To help other students in the future and enhance student success, what could be improved in the course?	This is the best liner algebra professor I;ve had here at state.
--------	--------
Please comment on the strengths of the course and instructor.	I really enjoyed this course, and I wholeheartedly wish that I could take another class with Catie Acitelli. It felt like she really appreciated us all as people, and she moved at a pace that was easy to keep up with. I also very much appreciated that she was a bit more lenient with deadlines, which was a lifesaver.
Please comment on the weaknesses of the course and instructor.	I don't really have a lot to say in terms of weaknesses!
To help other students in the future and enhance student success, what could be improved in the course?	The Webworks did feel a little bit disconnected sometimes, but that is kind of a given with standard homework questions, it seems.
--------	--------
Please comment on the strengths of the course and instructor.	Very enthusiastic and involved with the class. Willing to go to great lengths to help people. Overall, a great professor who I would love to take again.
Please comment on the weaknesses of the course and instructor.	Not quite comfortable with online class, I feel like she would be even better in person.
To help other students in the future and enhance student success, what could be improved in the course?	I really believe that just switching to in-person would make this course perfect.

---	---
Please comment on the strengths of the course and instructor.	Very passionate about the class and the material covered in it. She clearly enjoys what she does.
Please comment on the weaknesses of the course and instructor.	Can be too fast at times, making it hard to both write everything down and understand the material in real time.
To help other students in the future and enhance student success, what could be improved in the course?	If the class was in person, it would have fixed the only problem that I listed, since the information would still be on the board for a longer period of time to write down.
---	---
Please comment on the strengths of the course and instructor.	She clearly cares about the students and is always willing to answer questions and clarify the material/provide more examples if they are needed. The workload is manageable and quizzes and homework assignments are very helpful to prepare for the tests. Tests were very fair and I always felt prepared with all of the resources that were provided. Great instructor!
Please comment on the weaknesses of the course and instructor.	The course goes very fast and there are lots of theorems that you have to remember, which can be challenging. The webwork sometimes seemed a little bit harder than what we did in class, but it was doable.
To help other students in the future and enhance student success, what could be improved in the course?	Maybe just a summary sheet of the theorems we have learned, or more time in class for students to process what they've just learned since the class tends to go very quickly. Once we're back to in person classes, I think that allowing students to discuss problems as a group would be very good to help with this.
---	---
Please comment on the strengths of the course and instructor.	Catie really can connect with students well and seems to understand what students are going through since she is still a student herself.
Please comment on the weaknesses of the course and instructor.	Teaching this material is hard. It isn’t a weakness necessarily, but there are many units in this class that I simply still don’t understand
To help other students in the future and enhance student success, what could be improved in the course?	It should be a 4 credit hour class, not 3.
---	---
Please comment on the strengths of the course and instructor.	Answers all questions, wants her students to succeed, explains concepts well
Please comment on the weaknesses of the course and instructor.	Can go too fast at times
To help other students in the future and enhance student success, what could be improved in the course?	Add example questions tying together multiple concepts together
---	---
Please comment on the strengths of the course and instructor.	Daily polls and weekly quizzes were very helpful in gauging how well we understood content. Deadlines were reasonable and notes were always organized and easily accessible.
---	---
Please comment on the strengths of the course and instructor.	Concepts and material was explained thoroughly. Tests and homeworks were fair.

Please comment on the weaknesses of the course and instructor.	Some of the proof explanations could be rushed at times.
To help other students in the future and enhance student success, what could be improved in the course?	It was honestly a really great course.
---	---
Please comment on the strengths of the course and instructor.	Instructor was very kind and caring. She knew the content well and was very reasonable and flexible. I I enjoyed the class a lot because of the way she taught. Her weekly quizzes and daily polls helped me keep up and force me not to fall behind in an online environment.
Please comment on the weaknesses of the course and instructor.	From my viewpoint, there weren't really any weaknesseses of the instructor nor the course. It was pretty straightforward for me.
To help other students in the future and enhance student success, what could be improved in the course?	Perhaps spend more time in the beginning of the semester to focus on structure of proofs and how you would like them written with some more full examples of what you wanted.
---	---
Please comment on the strengths of the course and instructor.	Ok first the course is awful or whatever. But Catie. Where can I start. There is nowhere to start because she is all around one of the nicest people on the absolute planet and might be the best teacher ever in terms of making all the crap make sense. She is absurdly polite and straightforward with what she teaches. I literally want the world for her because she is so awesome. Love her.
Please comment on the weaknesses of the course and instructor.	The course sucks but Catie has literally no weaknesses ok thats not constructive. the worst part about Catie is that we are not in person so I can't actually like hang out with her. she is that cool.
To help other students in the future and enhance student success, what could be improved in the course?	Uhhh just get rid of the course it is awful and not useful whatsoever.
---	---
Please comment on the strengths of the course and instructor.	She is always willing to help, and tries to explain and answer questions in great detail if there is confusion. There are also links to other resources and videos that may help with understanding course content better. I like that there are more tests and that there are two portions of the test. Teacher is very fair and considering of students.
Please comment on the weaknesses of the course and instructor.	The course moves very quickly, and there is not much time to process information before moving onto next topic.
To help other students in the future and enhance student success, what could be improved in the course?	Wish there were more videos of practice problem examples and working through things.
---	---
Please comment on the strengths of the course and instructor.	Professor provided clear objectives for each week and did an amazing job making sure students understood the material. If further explanation was needed, resourced were provided. Easy to get in contact with for questions/concerns.
Please comment on the weaknesses of the course and instructor.	Little to none, maybe more space in the schedule for review for exams. If possible, a review session outside of classes?

To help other students in the future and enhance student success, what could be improved in the course?	Keeping doing what you're doing. Even though technology wouldn't work sometimes, the way you taught was wonderful and lot more effective than some of the classes I was in this semester.
--------	--------
Please comment on the strengths of the course and instructor.	Responsive to emails and questions and provides thorough responses Provides good explanations on concepts Shared a variety of additional resources and practice problems to help understand concepts, that brought the different elements together Wrote down all ideas and concepts from the lectures in the notes and this was nice as important ideas could be referenced again.
To help other students in the future and enhance student success, what could be improved in the course?	One thing that I think could be beneficial is working together on problems like the homework problems during the class in groups, although maybe not so much in an online environment.

16	Overall, the instructor created an effective distance learning environment	4.3	7	5	0	0	1	1	1	1.1	0.31	13	171	4.2	1.0

Note: 1. Results based on low response rates may not reflect the true class mean. Dept mean is for all undergraduate, or all graduate courses, offered by dept and is weighted by class size.

2. Results from cross-listed courses are included in the mean for the department whose course prefix appears first in the alphabet (e.g., for a course listed as HI and REL, the results are included in History's mean). To find the department mean for the other department (in this example, Philosophy and Religion), go to http://www2.acs.ncsu.edu/UPA/classeval/faculty/college_univ_means.htm .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Linear Algebra
Term: 2020 Fall	MA 405 601 Courses surveyed - MA 405 601
Question	**Response**
Comment on strengths and weaknesses of the instructor	Professor Acitelli is a wonderful instructor overall. She provides excellent study guides and practice problems, and the office hours are always very helpful. She is patient and friendly. I hope she could use more of her own teaching in this course instead of using the videos from other professors. (Personally I feel her teaching on this subject is more effective than the instructor in our video lectures).
Comment on strengths and weaknesses of the course	Strengths: Moodle page very clear; quizzes and exercise problems very helpful for understanding the materials, office hours very effective. Weaknesses: the video lectures are unedited (it still contains "discussion time" which makes no sense for distance learning students, and sometimes the instructor's voice can barely be heard.), the handwritings on lecture handouts are so hard to read (it would be better to have PowerPoints or typed handouts).
As a distance education course, the most difficult aspect of the course delivery was:	See the answer for the previous question.
If you could change only one thing about this course, what would it be?	Use professor Acitelli's own lecture videos, replacing the current ones.
Give suggestions on how the course or how the instruction could be improved.	I hope that this course could be more integrated, meaning that the lectures covering what we are tested in the exams. Currently, because of the reuse of past lecture videos, sometimes it is hard to locate the topics of the important materials. If there is a chance of remaking the lecture videos, I would suggest making/editing them as short clips. For example, 10-minute video with a clear topic (just one concept/definition/theorem and 2-3 exercises). Each Moodle chapter could have 4-5 of this clips. As a distance learning student, I do not want to listen to the murmurs of lecturers or a 10-minute students discussion in lecture videos. Those are a waste of time. If remaking lecture videos is impossible, some Youtubers have great series of lectures and those can be good alternatives as well.
--------	--------
Comment on strengths and weaknesses of the instructor	I'm still mad because I sent her an email in early September and she never fucking responded. It was incredibly disrespectful to me. I brought up a grievance and I got no response. How am I supposed to rely on instructors when they can't even take 2 minutes to email me back? Absolutely ridiculous and unprofessional.
Comment on strengths and weaknesses of the course	This class was difficult and I didn't feel like the homeworks accurately reflected the tests.
--------	--------
Comment on strengths and weaknesses of the instructor	The instructor always responded to student questions in a timely fashion which was very helpful.
Comment on strengths and weaknesses of the course	The course was presented well and sufficient aids were provided to help learn the material of the course.

As a distance education course, the most difficult aspect of the course delivery was:	The most difficult aspect of the delivery was the inability to ask other students questions.
If you could change only one thing about this course, what would it be?	I would make the exams slightly easier.
Give suggestions on how the course or how the instruction could be improved.	I would suggest that the tests for the courses would be lowered in difficulty slightly.
--------	--------
Comment on strengths and weaknesses of the instructor	Due to the nature of an asynchronous course, some of these questions aren't very applicable. But overall, the Prof. answered questions thoroughly and delivered the necessary materials needed to understand the contents of the class.
Comment on strengths and weaknesses of the course	Overall, I would prefer asynchronous courses when learning new materials. However, I also prefer taking tests in person and to occasionally interact with other students to make sure that everyone is on the same page.
As a distance education course, the most difficult aspect of the course delivery was:	Testing
If you could change only one thing about this course, what would it be?	With each new topic, I would add a little bit about how it could be applied in other areas of math or science.
Give suggestions on how the course or how the instruction could be improved.	The most difficult portion of this course were the "check box questions." These questions are magnitudes more difficult because they are essentially multiple true/false questions which are either all correct or all wrong.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was very accessible as a professor and always gave thorough answers to questions.
Comment on strengths and weaknesses of the course	This course did a good job of teaching the material despite it being totally online.
As a distance education course, the most difficult aspect of the course delivery was:	The exams.
If you could change only one thing about this course, what would it be?	More time on exams.
--------	--------
Comment on strengths and weaknesses of the instructor	Very kind and approachable, you made this class tolerable. This is my third time attempting this course (one drop, one fail, now this), and you have been the most understanding so far, your tests are challenging but with the bonuses it is manageable. THANK YOU
Comment on strengths and weaknesses of the course	It's a very hard course, I think that goes without saying, but you make it manageable!
As a distance education course, the most difficult aspect of the course delivery was:	Connecting with peers but someone made a groupchat

Give suggestions on how the course or how the instruction could be improved.	I think you did great, honestly I didn't watch the lectures. I had them over the summer and they didn't work, they were confusing to me and didn't click. I look at the notes provided, watch youtube, khan academy, and do the practice problems. All the problems and resources you provide are great! The practice worksheets are extremely helpful. I really appreciate your kindness and flexibility with us all, it really makes an impact. I recommended you to someone taking this course next semester. You're a very fair grader, the bonus points are a nice addition for us (it's kind, a lot of professors don't do that), the questions are challenging but reasonable. Thank you for your time with us!
--------	--------
Comment on strengths and weaknesses of the instructor	Very responsive and helpful when questions regarding homework came up. No weaknesses
Comment on strengths and weaknesses of the course	Course is good, set up well in my opinion.
As a distance education course, the most difficult aspect of the course delivery was:	Finding motivation to do the work
If you could change only one thing about this course, what would it be?	Nothing
Give suggestions on how the course or how the instruction could be improved.	Course is very good in my opinion
--------	--------
Comment on strengths and weaknesses of the instructor	The only weakness is that the Instructor was not entirely familiar with the recorded lectures and did assign one homework that was more difficult due to a lack of reasoning why it was not usually applied, However in situations like this, her strengths arose. Ms. Acitelli worked hard all semester to support us as students. She worked out difficult homework, validated our concerns, supported our learning, and was very supportive. She's an excellent teacher. Her direction, instruction, advice, and suggestions were all beneficial and helped support student learning.
Comment on strengths and weaknesses of the course	I loved the format of this course, although it may be best in-person, as I sometimes did not understand the content and could not immediately ask a question. The homework, quizzes, recorded lessons, and lesson notes were all very helpful to prepare students for the test and promote student learning.
As a distance education course, the most difficult aspect of the course delivery was:	Understanding some more complex content without immediate access to the teacher.
If you could change only one thing about this course, what would it be?	Access to external resources to provide additional support for more complex topics.
--------	--------
Comment on strengths and weaknesses of the instructor	The test was too hard! The homework assignment is not related to the test at all!
Comment on strengths and weaknesses of the course	The test was too hard! The homework assignment is not related to the test at all!
Comment on strengths and weaknesses of the lab (if applicable)	The test was too hard! The homework assignment is not related to the test at all!

As a distance education course, the most difficult aspect of the course delivery was:	When we need help, the instructor can't get there in time.
If you could change only one thing about this course, what would it be?	The instructor could make a test easier and make homework assignments related to the test.
Give suggestions on how the course or how the instruction could be improved.	The instructor could make a test easier and make homework assignments related to the test.
--------	--------
Comment on strengths and weaknesses of the instructor	It was very helpful to go to the office hours, and her answers about my questions were very clear.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was very helpful while being a full time busy grad student herself
Comment on strengths and weaknesses of the course	I think lectures could benefit from including more rigorous examples like the ones that appear on our homeworks
As a distance education course, the most difficult aspect of the course delivery was:	Nothing in comparison to in person courses.
If you could change only one thing about this course, what would it be?	I think lectures could benefit from including more rigorous examples like the ones that appear on our homeworks
--------	--------
Comment on strengths and weaknesses of the instructor	For question 3 and 8 referring to the individual in the recorded lectures* Catie was great.
Comment on strengths and weaknesses of the course	The recorded lectures were very confusing and hard to follow. Implied a lot of previous knowledge and understanding of linear algebra.
Give suggestions on how the course or how the instruction could be improved.	I think the lectures need to be updated to better explain the course information. Students are already taking the class online, recorded lectures did not explain thoroughly enough for this to be effective.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was very responsive and always more than willing to help with content in the course. Because she was unable to do the lectures there was some disconnect in the course, but I understand this was out of her control.
Comment on strengths and weaknesses of the course	The provided lectures were hard to follow and I do not feel like I gained a lot of knowledge from watching them. The extra worksheets and study guides were very useful, especially for tests. I feel like I improved my knowledge of the course through the extra sheets provided not the recorded lectures.
As a distance education course, the most difficult aspect of the course delivery was:	The lectures.
If you could change only one thing about this course, what would it be?	Letting the instructor over the course record the lectures. This would make the content connect a lot better.
Give suggestions on how the course or how the instruction could be improved.	The lectures should be updated. Since the lectures are a few years old and the lecturer is not the instructor designing the test so there is a lot of disconnect in the content.

Term: 2020 Sum10	MA 121 051 Courses surveyed - MA 121 051
Question	**Response**
Please comment on the strengths of the course and instructor.	Although this was an online course, I was thoroughly pleased with the course content and how it was delivered. The lecture videos were previously recorded but I still felt as though I was apart of the class when watching from home. I recall having a couple questions about a WebAssign homework and Ms. Acitelli provided me with multiple pages of handwritten answers and wrote out steps for each part of the problem. I truly appreciate her willingness to ensure each student's mental health and wellbeing are cared for especially during the time that this course took place. This class completed my math requirements but I would love to have her as a professor again.
To help other students in the future and enhance student success, what could be improved in the course?	WebAssign can be difficult to decipher exactly what solution they are looking for. For instance, WebAssign would want to have a negative exponent, when we were taught to NOT have negative exponents in our answers. Its just annoying to use WebAssign sometimes.
--------	--------
Please comment on the strengths of the course and instructor.	Shes amazing! Given the fact that it was online she made it easy to get help if needed
To help other students in the future and enhance student success, what could be improved in the course?	More practice work, consistent homework.
--------	--------
Please comment on the strengths of the course and instructor.	She knows what she is talking about- no doubt about that. She is very friendly and accommodating. She also teaches more than one way of doing things
Please comment on the weaknesses of the course and instructor.	This is so much information that I have never known about until this Summer
To help other students in the future and enhance student success, what could be improved in the course?	More lecture videos, Problem sessions, live lectures would be nice for like review or something
--------	--------
Please comment on the strengths of the course and instructor.	Covering everything on the tests
To help other students in the future and enhance student success, what could be improved in the course?	Since online now it’s easier to follow along but might be fast paced for in person.
--------	--------
Please comment on the strengths of the course and instructor.	This class has been at a great pace this summer especially with all the circumstances going on!
Please comment on the weaknesses of the course and instructor.	Maybe just more practice problems that are more similar to tests rather than the homework problems.
To help other students in the future and enhance student success, what could be improved in the course?	Practice the problems! In a class like this, you are set up for success, it is up to you whether or not you’re successful! It took me some time to realize this!
--------	--------

Please comment on the strengths of the course and instructor.	You are a fantastic teacher. I have struggled and stressed over calculus since the first time I encountered it. Now, I look forward to doing the work for this class. Clear, conscise instruction, and I can tell you are passionate! Thank you for making me enjoy Calc. Your semicolon tattoo means a lot to my, by the way.
Please comment on the weaknesses of the course and instructor.	I can't think of a single weakness of the teacher.
To help other students in the future and enhance student success, what could be improved in the course?	Find something more intuitive than web assign.
--------	--------
Please comment on the strengths of the course and instructor.	Even though this was an online class I felt that Catie made a strong effort to support all of her students and create a connection with all of us throughout the course. Instead of just posting the material online she kept in contact with us by sending emails multiple times a week about class information, and just to make sure that all of us were ok. I never felt embarrassed to ask a question or send an email about anything during the class. She did a very nice job of making an online summer course very doable and did her best to make it enjoyable.
Please comment on the weaknesses of the course and instructor.	She moves a little fast during lectures so I found myself pausing the videos a lot.
To help other students in the future and enhance student success, what could be improved in the course?	I do not think anything significant needs to be changed.
--------	--------
Please comment on the strengths of the course and instructor.	Very good lessons with multiple examples to follow. Explained concepts very well and ensured understanding before moving on. The instructor responded back to emails and questions in a timely manner.
--------	--------
Please comment on the strengths of the course and instructor.	I thought that this was one of the few courses in my opinion that can be taught online and students receive just as much out of it compared to being online. My instructor did a tremendous job keeping all of us up to date on due dates, upcoming test and quizzes, etc.
Please comment on the weaknesses of the course and instructor.	I did not recognize any weaknesses in the course or my instructor. I thought the pacing of the course was very appropriate and I also liked how each week of lectures and quizzes were laid out.
To help other students in the future and enhance student success, what could be improved in the course?	There was nothing that I noticed in this course that I found to poorly alter student success and there was nothing I found that needed to be improved about this online summer course.
--------	--------
Please comment on the strengths of the course and instructor.	I really liked the lectures because they felt like I was still in the classroom and that there was partial credit on the tests
--------	--------
Please comment on the strengths of the course and instructor.	I think professor Acitelli did a great job at making sure we had all the materials we needed to succeed. I found her grading to be fair and helped if we had problems.

Please comment on the weaknesses of the course and instructor.	I didn’t think the instructor had any weaknesses I think she did good for it being all online.
To help other students in the future and enhance student success, what could be improved in the course?	Nothing the course was good.

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Elements of Calc
Term: 2020 Sprg	MA 121 001 Courses surveyed - MA 121 001
Question	**Response**
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Not applicable because she wasn't the instructor till after spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Strengths- Gave us access to all of our course notes at once and gave us a guideline for watching these every week (so we could keep up w the lessons). She also answered questions about the course and how it would be for the rest of the semester. Weakness- she could've made the lecture videos available on youtube or something more accessible than mediasite (it lags a lot).
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Making sure that lecture videos are fully accessible.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	N/A she wasn't teaching before spring
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Catie was great. She was very prompt to answer emails and was always willing to help. She made supplementary material when needed and was a lot of fun to listen to in her recorded lectures. She was well-prepared and was very clear with her expectations.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Catie was great!
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	was not our professor
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Awesome teacher! Really helpful even though learning Calculus online by yourself is a struggle. She is great!
--------	--------

Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	She was not the instructor of our class
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	I never met her in person but I really did enjoy watching her lectures. She made math easier and it was not totally boring to watch her lectures. Most of the students in the recorded lectures asked good questions that I would've asked myself so I did learn outside of physically being in the classroom. I never met her in person but I really did enjoy watching her lectures. She made Math easier and it was not totally boring to watch her lectures. Most of the students in the recorded lectures asked good questions that I would've asked myself so I did learn outside of physically being in the classroom
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Like I said in the review for my other MA 121 teacher. Just adding supplemented video links in case students still don't understand what they are learning. I had to search for those on my own such as khan Academy videos
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	We did not have Professor Acitelli before Spring Break
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She was great! Responded in a timely manner to emails
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Easier way to get to the online lectures such as a link in Moodle
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Ms.Acitelli has done a great job picking up and teaching us for the remainder of the semester including very thorough notes and videos to help us learn.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Very very considerate! Professor Acitelli really made a strong effort to get the students opinions and concerns. Here lectures were very easy to follow and learn. Great professor!
--------	--------

Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Very good at organizing material online and reaching out to a new class with clear information. Answered questions fairly and helped me get used to the online math class.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	My only suggestion would be to make use of the calendar on Moodle.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	I really enjoyed the recorded lectures because they were filmed in actual classroom environments so there'd be students asking questions which helped with understanding the concepts better. I also liked the structure of the notes that were taken which helped me study for the test quite well. The notes really got down the concepts and provided good examples of uses for those concepts. There were a lot of email updates as well which were helpful at explaining our new class procedures.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	It's pretty clear that the online lectures were organized well, which helped create a very easy transition into online course material. However, going from three 50 minute in-person lectures a week into three 70 minute video lectures was a bit tough. I think spreading out the videos more would help alleviate that bit of stress.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	N/A for Catie.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Strengths: The lecture videos were very helpful and enjoyed the teaching style.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Watch the videos on time and don't fall behind.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Open to students, instructor was available. Coursework was slow paced.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Nothing
--------	--------

Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Her videos are easy to find. She explains the topics with enthusiasm. Her emails made me feel a lot less stressed and she continues to offer to talk to any students and has sent out resources for anyone who is having trouble.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Catie Acltelli was not my instructor prior to spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Stayed on top of topics; always open for questions; always sending and responding to emails, which was very helpful.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Stay on top of the videos and notes.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	WISH we had you before COVID-19 started!!! BUT you were probably amazing before in other classes tooooo.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	The online pacing guide REALLY helped me out AND allowed you to not have to send constant emails to us! I love love love you straightforward lectures so 10/10!!!
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	This is Savannah Ball, idk if this is anonomus or not, but I want you to know you're killing it and I am your biggest fan! Not even kidding I love your teaching style and CANT wait to see how and where you grow! Proud of you Mrs. A, you rock!
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	I did not have her before the covid 19
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Explains subjects well. I wish i had her before spring break

To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Explains it well.
---	---
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	I didn't have Catie before spring break
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She has sent out emails to stay in touch and has been really understanding. I like the videos she posted for her lectures. She made sure that if we had any questions that we knew we could ask her.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Probably just figuring out how to rename the online videos to keep things less confusing.
---	---
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	I did not have this teacher before spring break and therefore I have no opinion of them for this time
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	This teacher has been an amazing teacher for this online course. Her lectures are very well done and explain everything almost perfectly. Her office hours are flexible and very helpful. She has been extremely useful
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Allow the tests to be all day and ensure that office hours are flexible.
---	---
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	N/A wasn't the teacher before spring break
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Great videos and she took the time to email to make sure everyone was doing alright 10/10 doing a great job
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	make sure the lecture videos are working because some videos wouldn't always load.

--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	The course was slightly fast-paced in class and was a little difficult to understand but the test were pretty well centered around what we were learning and being allowed to use a calculator made it much easier.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	The course after spring break became a little easier to understand with the lecture videos by Catie. She set up a guiding video that correlated with the videos she wanted to watch, which made it much easier on us. She was also very flexible and making our test window longer which was very much appreciated.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	I think the way Catie Has set up the online format has been very easy to understand and I would keep it how it is quite frankly.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	I didn't have her prior to the break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Post-break, Ms. Acitelli was a substantial improvement to our previous teacher. She is superior at explaining the content in detail before moving on to practice, which greatly improved my grade. That said, there were still problems with the online format of classes. It appeared evident to me that our online lectures were from a previous year and -as such- I was sometimes unsure what I was supposed to be watching, and being unable to ask questions certainly hindered my learning capability. Additionally, testing simply became harder. This may have been a product of content rather than teaching, but our first test post-transition took me 2.5 hours to complete. It was my best grade so far this season but was also tremendously difficult.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Be sure to do the homework. Study VERY hard because the tests will be harder than they otherwise would be.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	She was not teaching before spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She made the directions very clear of what we needed to do in this class. I wish there was a way to monitor attendance online, but that is my only complaint. She explains the math much better than the prior teacher and I learned much more watching her lectures.

To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Live zoom sessions for questions.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	I mean, she was good at emailing us, but when I tried to email her, she said she would do something and never did
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	The course was run by Ainur Akchambayeva.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	The course has been really similar to before spring break since there are recorded lectures and the notes and everything are uploaded online after the the lecture is posted.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Nothing really. The tests are the same as before besides uploading them online and such. The work load is not too much and it was easy to stay caught up in the class.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	After Spring Break the instructor done an excellent job of covering material that was needed to learn. Math has never been a strong subject for myself, and by watching the lecture videos I felt like the subject of calculus became easy. The instructor also made a good decision to allow the testing windows to be open for a whole day for somebody like me who had a very busy schedule before the online learning process, which only got more hectic after spring break.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Did not have her as teacher before spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She did an excellent job of uploading resources to Moodle. She also had emails to go out often to inform students of what to expect in the upcoming week. I believe that tests should have been easier to upload then the way we were given to do so. It was very complex way to upload a test.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	The online format was pretty good. It helped the student get success from the format. I also enjoyed how the students could set their own pace.
--------	--------

Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	The online classes and pacing guide were very helpful. They were much longer than in class lessons would have normally been which was a difficult adjustment. She was very understanding and encouraging given the circumstances.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	N/A (I did not have her until after spring break).
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She had multiple examples outlined for the students to follow along with.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Write out the steps to the problems to help students become more comfortable with doing the problems on their own.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Did not have instructor prior to spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	AMAZING. She transitioned so well and was more than prepared. She is quick to getting back to you via email with any questions you may have, and gives in depth explanations that help you fully grasp the concept.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	I can not think of any improvements necessary. She is amazing and a wonderful teacher.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Ms. Acitelli has been a great calc professor! She ran the course after spring break and it was wonderful. She communciated with us often about what videos to watch and which assignments to complete. The videos were easy to understand and I learned a lot from them. I do wish they were a little shorter, however. It can be hard to stay focused when you are in your home.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	I wish we could get our tests back and see what we missed. Even if the graders just left a note about which question we missed, that would still be helpful.
--------	--------

Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Catie was very kind and always took the time to communicate with us. She made it very clear about what assignments were due and when they were due.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	I can't think of any improvements.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Did not have before the change.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Professor was very helpful and communicative. One weakness was the lectures did not explain how to do problems/math processes during the class. It was almost as she assumed everyone knew what they were doing. These were prerecorded lectures that I think could be improved in the future. Overall, I think the class was handled very well.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Updated lectures where there was more thorough instruction.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She included videos from the past and told us to watch from this time to this time instead of editing the part we had to watch and posting that instead, seemed to be lazy and complicated things. Not very understanding either.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	made efforts to be accessible to students. was attentive to the needs and concerns of students and made decisions which were in our best interest. provided resources for our continued success and effective learning

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Elements of Calc
Term: 2020 Sprg	MA 121 003 Courses surveyed - MA 121 003
Question	**Response**
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Was not professor
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Very adapting, understanding, and helpful
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Was not our professor before spring break so not applicable
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Strengths: Did a great job communicating to the class as we switched professors midway through the semester. She continued to teach the class on the same schedule as before. She didn't change the original syllabus, which I very much appreciated. Very accessible via email and always willing to help. Very caring and nice.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Did a great job transitioning given the unprecedented circumstances.
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	She’s a great teacher to be honest. Nothing else to say.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Do the work and stay focused
--------	--------
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	+very responsive +wants students to succeed in the course +a lot of information about the course -maybe to much information, could be reduced to a minimum so easier to process *when referring to information i mean not the content of the course but how the course will proceed and what things are important etc.
--------	--------

Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Did not have as an instructor before spring break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	I really like her. I wish I had her before spring break! I love the teaching style, even though videos are personally, a little hard to learn from. She is very understanding and I appreciate her streamlining and organizing the material like she has. She is there for us, even though it is difficult virtually.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	How the material is organized is very helpful but videos are always hard to learn from.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	had different teacher
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Strength: Knowledgeable and flexible Weakness: Had lectures from last semester had to skip around and was confused on the format
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Cut the lectures down to just what we need to learn so it is straight forward. Other than that very helpful.
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Didn't have class with Catie Acitelli before Spring Break.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Really enjoyed this class. It must have been really hard for Catie Acitelli to adjust to the online classes as we never had class with her before. We had all the videos from last year to watch and she was always sending us emails with recaps of what was expecting from us for the week. Very good class.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Nothing to say
--------	--------

Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	N/A Did not have this instructor before Spring Break
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	Strengths: Lecture videos are very organized and instructor made sure to answer emails fast Weaknesses: None
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	Homework questions should be more similar to lecture videos, some homework questions are not covered in the material taught
--------	--------
Please consider the course and instructor PRIOR to Spring Break (i.e., prior to the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor PRIOR to Spring Break.	Simple, understandable class. Homeworks, tests, lectures. Everything organized. Easy to understand.
Please consider the course and instructor AFTER Spring Break (i.e., after the COVID-19-related changes in instruction). Comment on the strengths and weaknesses of the course and instructor AFTER Spring Break.	The same as in-class, only tests were online in moodle system.
To help other students in the future and enhance student success, what could be improved in the course after it was transitioned to a totally online format?	I highly suggest to take this course in-class. In-class you have professor that immediately after class you can ask questions. Tutoring is beneficial as well.

Note: 1. Results based on low response rates may not reflect the true class mean. Dept mean is for all undergraduate, or all graduate courses, offered by dept and is weighted by class size.

2. Results from cross-listed courses are included in the mean for the department whose course prefix appears first in the alphabet (e.g., for a course listed as HI and REL, the results are included in History's mean). To find the department mean for the other department (in this example, Philosophy and Religion), go to http://www2.acs.ncsu.edu/UPA/classeval/faculty/college_univ_means.htm .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Elements of Calc
Term: 2019 Fall	MA 121 003 Courses surveyed - MA 121 003
Question	**Response**
Comment on strengths and weaknesses of the instructor	Great teacher. Explained material very clearly and with excellence.
Comment on strengths and weaknesses of the course	Homeworks and practice tests were super helpful.
--------	--------
Comment on strengths and weaknesses of the instructor	She is as close to perfect as a teacher gets. The only flaw if any I have observed is that she doesn't always give herself credit for the hard work that she does.
Comment on strengths and weaknesses of the course	The only weakness I would give is not a criticism on Professor Acitelli's teaching skill or awareness of material but the expectation for which the faculty leaders are placing on staff like her and students enrolled in Math courses. By having only two sessions a week to cover material, the students are overwhelmed and struggle to absorb the lessons with true understanding. The speed of lessons encourage some students to struggle with comprehension of the material. The book was also quite useless with understanding some of the lessons.Without change, under the current standard of operation for this course, only those talented/gifted in math can succeed.
Give suggestions on how the course or how the instruction could be improved.	Increase the number of course days and the number of exams to decrease the severity of grade accumulation.
--------	--------
Comment on strengths and weaknesses of the instructor	Overall, I believe that Ms. Acitelli was a great professor. She was to the point with all of the content.
Comment on strengths and weaknesses of the course	I love how Ms. Acitelli provided ample resources to help us prepare for the test.
--------	--------
Comment on strengths and weaknesses of the instructor	A very good teacher overall, my only complaint is that she goes through the lessons far too quickly to understand.
--------	--------
Comment on strengths and weaknesses of the instructor	Absolutely outstanding teacher. She truly cares that her students grasp the course material. She makes class fun and she’s extremely receptive to students needs, never overwhelming them.
--------	--------
Comment on strengths and weaknesses of the instructor	She is a great teacher. Strengths: good communicator, explains things well, asks us how we are doing with the material, makes study guides and tells us exactly the kinds of problems that are on tests so you always know what to expect weakness: because it's a big class she moves really fast which can be overwhelming

Comment on strengths and weaknesses of the course	Strengths: everything builds so it is easy to refresh your knowledge of the last section in the newer sections so you don't forget how to do something and it makes studying for the final easier Weakness: a lot to cover in a short amount of time, wish I had more time to go over certain sections i struggled with
Give suggestions on how the course or how the instruction could be improved.	She is a great teacher and she makes herself available in office hours twice a week. I always go to office hours and she is really helpful. I don't have any suggestions on how to improve it besides making the class size smaller, because I think it can be hard to learn math in a big class.
--------	--------
Comment on strengths and weaknesses of the instructor	Funny, always enthusiastic, always provides quick responses to questions through email, always available at office hours, fantastic instructor (this is from someone who has always struggled in math), she definitely knows how to TEACH instead of TELL students how to do math.
Comment on strengths and weaknesses of the course	Practice problems always available and multiple resources are listed to find them. Email updates always keep us in the know of any changes in office hour schedule/homework/unit course work.
Give suggestions on how the course or how the instruction could be improved.	NONE! She was a spot on professor!
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths- Knows what she's doing Weakness- Goes way to fast with material, barely teaches it.
Give suggestions on how the course or how the instruction could be improved.	Slow down and do more student interaction
--------	--------
Comment on strengths and weaknesses of the instructor	Material was delivered very quickly but that’s the nature of a calculus class.
Give suggestions on how the course or how the instruction could be improved.	Felt like I did much better than I had anticipated. Ms.Acitelli is very passionate and does a great job of communicating with students.
--------	--------
Comment on strengths and weaknesses of the instructor	The resources provided are easily accessible and helpful, especially the class videos. Our class is in the late afternoon and being able to rewatch parts of the lecture have helped me tremendously in a deeper level of understanding of the material. I have never taken calculus and I have been able to learn a ton. She goes fast sometimes, but you can always go back and rewatch if you need to so we are able to cover a lot in a class.
Comment on strengths and weaknesses of the course	I think my own struggle in math is the only thing that would be considered a weakness, however the resources and instruction are all there and if they are properly utilized, success is not hard to achieve. Our class averages are always so high for tests and quizzes, and it is because of the effective instruction.
Give suggestions on how the course or how the instruction could be improved.	I have learned so much this year compared to my previous math courses throughout high school, I don't really have a way to improve the course but instead could improve my own performance with more usage of the resources provided, which are readily available and useful.

--------	--------
Comment on strengths and weaknesses of the instructor	She is very knowledgeable about the topics and ideas she is teaching. She was able to explain and show how she was getting the answers to questions.
Comment on strengths and weaknesses of the course	This course is a very big step in difficulty from another college pre-calculus class.
--------	--------
Comment on strengths and weaknesses of the instructor	She is really close to being a strong teacher and I know she has over 100 students in the class but sometimes she needs to take it a bit slower. Her weakness is not realizing when she has lost most of the class. Her strength is explaining in detail though.
Give suggestions on how the course or how the instruction could be improved.	Slower pace (sometimes) More available office hours (if possible, I was always in class during my teachers)
--------	--------
Comment on strengths and weaknesses of the instructor	Worked too fast. Step by step explanations for each problem would be helpful instead of verbally saying what the next step is.
Comment on strengths and weaknesses of the course	Longer tests to have a chance at a higher grade
--------	--------
Comment on strengths and weaknesses of the instructor	she didn't really teach she kind of just did the problems from the textbook in front of us. I did most of the teaching on my own by just looking at the notes. It wouldn't have been necessary to go to class.
Comment on strengths and weaknesses of the course	pointless piece of shit class that I never want to have to do another problem from again.
Give suggestions on how the course or how the instruction could be improved.	get rid of this class
--------	--------
Give suggestions on how the course or how the instruction could be improved.	Textbook was not necessary in order to make an A in the course.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli was great at incorporating the necessary elements of Calculus, and she was always passionate about the class. She always provided examples and definitions so that students understood the material. If one did not take Calculus in high school then the course would have probably been pretty difficult, but I definitely think Ms. Acitelli is a fantastic instructor!
Comment on strengths and weaknesses of the course	I definitely feel more confident about my knowledge of Calculus! The course was great and the inclusion of examples was SO helpful! Test prep and equations were provided to help us study (and it was very helpful indeed!).
Give suggestions on how the course or how the instruction could be improved.	Maybe make the class better for beginners, but overall I would say the course was great and that there is little need for improvement!
--------	--------

Comment on strengths and weaknesses of the instructor	She is one of the most prepared and organized teachers I have. She explains everything clearly at a good pace, and if you do not understand the material the first time she posts all the lectures online so we can go back and watch. She is also very responsive to emails and helpful in office hours.
---	---
Comment on strengths and weaknesses of the instructor	Instructor was amazing and had lots of experience and knowledge. Things were written clearly and explained well, and the instructor explained a lot of the content in a way that new calculus learners could understand.
Comment on strengths and weaknesses of the course	The webassigns sometimes were sometimes really hard and distracted from learning the core concepts of the unit. The complexity of some of the problems just made it overwhelming and hard to know what to expect for the class. However, notes and examples were really helpful. I think there could have been a couple of quizzes (maybe assigned online if there is no time in class to do so) so that students could gauge their learning and have feedback before the test. Often times I had no way of knowing if I had mastered the material until the test and by then it was too late to make improvements or ask questions. Maybe even having take home quizzes or assigning homework that must be done by the next class/next week would encourage students to be actually working to understand the content day by day instead of cramming right before the test and feeling overwhelmed. The size of the class made it difficult to feel confident enough to ask questions or confront the professor when I felt like I really hadn't understood something (I was afraid to ask "stupid questions"). Another issue was the fast pace of the course but I know that is out of your control. I enjoyed the instructor and felt that they were very accessible and helpful when I had concerns or complex questions. I just wish It wasn't so fast paced and I wasn't so bad at math. I wish I had reached out to the instructor sooner because she was really willing to help and cared about my success and understanding of the content, even though the size and atmosphere of the class would suggest otherwise.
---	---
Comment on strengths and weaknesses of the instructor	She knew what she was talking about and made the notes very clear. She was a little fast though but very helpful during office hours.
Comment on strengths and weaknesses of the course	She taught a little fast so sometimes I felt that I was more focused on writing down the notes than actually processing and learning the material.
Give suggestions on how the course or how the instruction could be improved.	If there is any way to put the notes online before the lecture then it would be so helpful so that students would be able to concentrate more and process the material more as she is teaching it.
---	---
Comment on strengths and weaknesses of the instructor	Could slow down a bit during instruction or at least leave notes in view longer in order to completely write down everything.
Give suggestions on how the course or how the instruction could be improved.	Just slow down a bit is all like I said before.
---	---

Comment on strengths and weaknesses of the instructor	I love Catie, she is absolutely hilarious and her love of math really fuels the class. If she weren't so interested and fascinated by math the course would be extremely boring and dreadful. With her daily math jokes and great explanations she really makes learning calculus easy.
Comment on strengths and weaknesses of the course	Webassign is the worst thing ever. 10/10 don't recommend it.
Give suggestions on how the course or how the instruction could be improved.	Nothing, Catie is great, keep making math jokes and flexing that pi tat.
---	---
Comment on strengths and weaknesses of the instructor	I failed my calculus class last year with professor Griggs. Everything in this class taught by Catie was well explained, multiple examples of all difficulty were given, clearly written, and just made so much simpler. She's one of those great teachers that doesn't confuse you with inapplicable information, she teaches what you need to know. As a hater of math, I enjoyed coming to this class most days, and even found it interesting. She made calculus, an impossible subject for me, both easy to understand and fun to do. The only thing I would ask her to do would be to slow down when writing the example problems and give the class more opportunities to try them, because sometimes we fly through them and I don't have time to understand it, only write it down. If I had had Catie as a teacher last year, I really do think I would have passed the class.
Comment on strengths and weaknesses of the course	There is not enough time for the course, it should be 3 times a week or an hour and a half instead of an hour and 15 minutes. Catie did a great job spacing everything so we could learn at a reasonably quick pace, but she should not have to do that. Having less time for this class stresses everyone out. Towards the end of the course, we had to cram several units into each day and I ended up doing poorly on that test because there was not enough time or enough examples to completely learn everything.
Give suggestions on how the course or how the instruction could be improved.	It's already good, but if she could slow down a little when transitioning between example problems, even a 5 second pause would be great. I know there's not a lot of time to teach this class, so I understand that she's doing what she has to do, but it does take away from the learning process in class.
---	---
Comment on strengths and weaknesses of the instructor	I feel like I learned a lot more in this class than I thought I would. She made the class more understandable than I could've expected. As someone who had never taken calc, I can tell that I definitely improved from the beginning.
Comment on strengths and weaknesses of the course	I wish some of the web assigns weren't so specific, some of them were seriously impossible
---	---
Comment on strengths and weaknesses of the instructor	Give Catie a raise, best math teacher I have ever had.
Comment on strengths and weaknesses of the course	I loved this class, it made me rediscover my love for math.
Give suggestions on how the course or how the instruction could be improved.	It is seriously already perfect.
---	---

Comment on strengths and weaknesses of the instructor	Best math instructor I have ever had. Many helpful, clear ways of explaining content and good use of broad examples to increase understanding of material. Also very accommodating outside of class.
--------	--------
Comment on strengths and weaknesses of the instructor	The professor explained materials for someone who already had a knowledge of calculus. The class instruction moved too quickly and it was very difficult to take notes with the speed and method (document camera) that the professor used. Essentially, attending the lecture was worthless, but you don't have the freedom to skip class and use the time to teach yourself, because attendance is mandatory and your success in the class is hinged on being present (exam drop policy).
--------	--------
Comment on strengths and weaknesses of the instructor	One of the best math teachers I have ever had. Takes everything step by step, well explained subjects, the only thing that was weird was the test grading occasionally. I understand the reasons behind why they took points off, just think It might be a little misplaced.
Comment on strengths and weaknesses of the course	Some subjects just had to be skipped, maybe restructure a little. Most gets all the basics and prepared me well
Give suggestions on how the course or how the instruction could be improved.	I think it was a perfect format. Sometimes felt long, but I think the class format shouldn't change because it would just make it more annoying.
--------	--------
Give suggestions on how the course or how the instruction could be improved.	I believe the instruction could be improved on. The instructor went very fast and was hard to learn concepts of calculus. I have received tutoring from friends in engineering who are in higher levels of calculus and they have showed me the ways they were taught the material to simplify the processes. They showed me acronyms and rules to specific concepts to learn the material while the instructor relayed the information in a difficult way. It seemed like most classmates were lost during lecture as it was a struggle to just keep up in writing notes. The webassign platform used for homework was very annoying in that students had to key in a perfect answer using computer symbols that coded to webassign. You may have the answer correct but miss a parentheses or an asterisk and completely get the question wrong. When we had to type in long answers, it made the process quite difficult to finally get the coding correct. I have used other math homework platforms in the past such as "mymathlab" that were simpler to use.
--------	--------
Comment on strengths and weaknesses of the instructor	I ended up withdrawing from the class because she moved so fast and never stopped for questions. I think it was hard for her to understand that some people in that class had no prior calculus or precalc experience so it was very overwhelming when she wouldn't take the time to explain why we had to do some things or how concepts related.
Comment on strengths and weaknesses of the course	The homework was hard and there were no solutions or ways to get help outside of class or office hours if you needed them. There were no other resources to help unless it was her or the TA.

--------	--------
Comment on strengths and weaknesses of the instructor	Definitely cared about what they were teaching, and any topics covered were covered thoroughly. They did, however, go over TOO many examples in my opinion.
Comment on strengths and weaknesses of the course	Practice tests and homework were both extremely helpful in hammering in the concepts learned during lectures, nothing wrong with the course in my opinion.
Give suggestions on how the course or how the instruction could be improved.	No suggestions needed.
--------	--------
Comment on strengths and weaknesses of the instructor	Very nice and easy to understand for the most part, it's difficult with such a large class to ask question.
Comment on strengths and weaknesses of the course	Course was kind of all over the place, many of the concepts were completely different and not useful.
--------	--------
Comment on strengths and weaknesses of the instructor	Katie was a very fun but effective math teacher who really cares about her job and her students. She was understanding with us and wanted us to suceed but also did her best teaching us some really difficult topics. The only issue I had was at the beginning of class she would work at a lot slower pace making sure we understood the topics, but as class got closer and closer to the end she would move at a faster and faster pace to finish everything she had planned and sometimes it felt pretty hectic.
Comment on strengths and weaknesses of the course	The WebAssigns were pretty glitchy and frustrating to deal with at times
--------	--------
Comment on strengths and weaknesses of the instructor	The best math teacher I have ever had. Catie was so enthusiastic and I know she loves what she teaches, and even more importantly, she loves helping us out.
Comment on strengths and weaknesses of the course	This course really helped spark an interest for Calculus in me. However, because she taught so well, I found that I really didn’t need the textbook I purchased.
Give suggestions on how the course or how the instruction could be improved.	AMAZING TEACHER! I guess the only way to improve this course personally would be if it were made smaller, but that is impossible because I know a lot of people need to take the course.
--------	--------
Comment on strengths and weaknesses of the instructor	The office hours were very useful, and allowed for students to be able to ask questions they couldn't in class, or get an explanation of things that they didn't understand from class.
Comment on strengths and weaknesses of the course	I truly enjoyed this course, even though I was worried because math has never been my strong suit, but when I was in this course I truly understood what I needed to learn, and understood the material.
--------	--------

Comment on strengths and weaknesses of the instructor	I really enjoyed having Catie as an instructor! She was extremely helpful and explained the material well. She went a little fast in the class lectures with notes, but there is a lot of material to cover in little time. I think her tests lined up well with the study guides and practice material she gave her students. Overall, probably my favorite class this semester!
--------	--------
Comment on strengths and weaknesses of the instructor	Very helpful with making sure her students understand the information she's teaching.
Comment on strengths and weaknesses of the course	The course was easy to understand if you did the infoation that was given
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths: effectively teaches concepts, easy to understand, helpful office hours and provides numerous study materials Weaknesses: covers material extremely quickly while in class, making it difficult to process information. This may have been necessary, though.
Comment on strengths and weaknesses of the course	Webassign was not a good tool for learning the material. Since there was no feedback or reasoning given when an answer was wrong, it was extremely difficult to grasp concept completely.
Give suggestions on how the course or how the instruction could be improved.	If there was less material to cover, or an alternative way for homework, it would be much easier to fully grasp the concepts and material
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli always went the extra mile to ensure her students understood the material.
Comment on strengths and weaknesses of the course	The use of web-assign should be evaluated. I have used web-assign at a different institution and it offered examples and step by step instructions were available along with videos. I can't understand why NCSU does not use these features to enhance learning. Using web-assign is so confusing students never know if the answer is wrong due to incorrect input or inability to perform problems.
--------	--------
Comment on strengths and weaknesses of the instructor	It helped that the professor recorded the course. Every time I didn't understand I could go back and rewatch the lecture and work out the problems. That was huge in my success in this class.
Comment on strengths and weaknesses of the course	Web assign is just busy work, and not helpful in understanding course material.
--------	--------
Comment on strengths and weaknesses of the course	the course was very fast paced.
--------	--------
Comment on strengths and weaknesses of the instructor	In such a big lecture class, it is nearly impossible to keep every single student engaged throughout an hour and 15 minute class. Yet, Ms. A keep most students engaged by simply not being a robot. In some of my other lecture classes, they just read from the screen, but Ms. A would answer questions, explain all of the steps she was doing in each problem, and make jokes to relate to us. She let us do problems on our own and walk around to see if students needed more help. She was always available at her office hours. I feel she was very effective in teaching such a complicated subject to 220+ students.

Comment on strengths and weaknesses of the course	Since calculus can sometimes be very difficult, it would be nice to have had a small lab type class where small groups could have been formed to work out problems together and get more individual attention. This attention could have been achieved at her office hours, if a student were to go out of their way (which they should do if they were struggling).
Give suggestions on how the course or how the instruction could be improved.	Ms. A needs to never change. She is amazing!
---	---
Comment on strengths and weaknesses of the instructor	Excellent Examples and work with students.
Comment on strengths and weaknesses of the course	Big class size
Give suggestions on how the course or how the instruction could be improved.	Smaller class sizes but great overall teaching and leadership
---	---
Comment on strengths and weaknesses of the instructor	Very knowledgeable but also moved pretty fast.
---	---
Comment on strengths and weaknesses of the instructor	This teacher is great, compared to what all my friends say about their MA 121 professors. She effectively used class to ensure everyone understood complicated subjects in the course material.
---	---
Comment on strengths and weaknesses of the instructor	Explained concepts in a way that could be easily understood.
Comment on strengths and weaknesses of the course	WebAssigns were terrible.
---	---
Comment on strengths and weaknesses of the instructor	This instructor was one of my favorites this semester. She was extremely good at presented the content in different ways in order for us to understand. She did a great job at explaining how to do things and gave many examples. She always made sure to ask if we had questions and addressed everyone's individual needs even though the class was very hard.
Comment on strengths and weaknesses of the course	The course was setup very well and I would not have done so well if it weren't for this instructor.
Give suggestions on how the course or how the instruction could be improved.	No improvements necessary.
---	---
Comment on strengths and weaknesses of the instructor	Professor Acitelli is great, she really wants her students to do well and she's a great teacher.
---	---
Comment on strengths and weaknesses of the instructor	She was an awesome teacher and explained the material in a way that everyone understood and went over things that people didn't understand.
---	---
Give suggestions on how the course or how the instruction could be improved.	The course was taught very well and I am glad that I got Acitelli because I feel she taught me calculus very effectively.

--------	--------
Comment on strengths and weaknesses of the instructor	She taught all of the material well. She could have given specific book problems that we could do on our own time to practice.
Comment on strengths and weaknesses of the course	It went really fast, but the objectives we had to learn for each test were reasonable.
--------	--------
Comment on strengths and weaknesses of the instructor	Really enjoyed the teaching style. Even though classes where long, the instructor help make it enjoyable!
--------	--------
Comment on strengths and weaknesses of the instructor	The instructor used a lot of examples to show how to work problems we needed to know for tests.
Comment on strengths and weaknesses of the course	I thought the class was straightforward. I did the assigned homework and practices for the tests and did well in the class.
Give suggestions on how the course or how the instruction could be improved.	Not many suggestions, but maybe try to make the Webassign or homework more similar to test questions.
--------	--------
Comment on strengths and weaknesses of the instructor	Went really really fast during class, wish she would have given us more chances to try problems on our own during class. Obviously very smart so might not be able to grasp that some students don't really understand what she has already mastered.
Comment on strengths and weaknesses of the course	Never even touched the textbook because it made absolutely no sense, WebAssign was tricky only because of the certain way things had to be entered.
Give suggestions on how the course or how the instruction could be improved.	slowing down, giving more opportunity for in-class practice.
--------	--------
Comment on strengths and weaknesses of the instructor	Overall the instructor was effective. The only downside was the pace. At times I feel like we crammed too many lessons into a class.
Comment on strengths and weaknesses of the course	The videos, practice tests, and homeworks really helped prepare me for the tests. They gave very similar questions and provided you with feedback.
Give suggestions on how the course or how the instruction could be improved.	Overall the class was taught well. We were given lots of resources to be successful.
--------	--------
Comment on strengths and weaknesses of the instructor	She's good
--------	--------
Comment on strengths and weaknesses of the instructor	She was very personable and never hesitated to explain things extra or do extra examples when people didn't understand. She gave us materials that were very helpful and made her office hours super accessable and accomidating.
Comment on strengths and weaknesses of the course	The textbook was a waste of money
Give suggestions on how the course or how the instruction could be improved.	As someone who doesn't have a future in math at all, this was a good introductory course to calculcus and I didn't feel like it was a waste of time.

--------	--------
Comment on strengths and weaknesses of the instructor	It was a lot of information in a short amount of time, but Ms. Acitelli did great. She was always avaliable via email and office hours. Really made class fun even though it was calculus.
Comment on strengths and weaknesses of the course	I don't like webassign, but overall the course was good. It is alot of material but managable.
Give suggestions on how the course or how the instruction could be improved.	The instructor was great we need more like her. The course would be better if we were allowed to use a graphing calculator. In real life it is available, and we were taught to know how to use them so we should be able to continue using them.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was kind, supportive, caring, and overall the best she could have been. I struggled throughout the course and she took time out of her day to listen and help me consistently. The only critique was that it was a very fast paced course, which made keeping up challenging.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms.Acitelli is by far the most helpful, caring, and strong professor I have had this semester and in my whole academic career. She offers many resources to ensure that every student has the opportunity to succeed in Calculus 1. She took a lot of her own time to tutor me because I could not make it to her office hours due to my class schedule. She is very friendly and never makes you feel dumb when you are struggling with the material. Anyone would be lucky to have her as a professor!
Comment on strengths and weaknesses of the course	Calculus one has caused me to discover my true passion for math! So much love for the material given!
Give suggestions on how the course or how the instruction could be improved.	No improvements needed. Wonderful instructor!!!
--------	--------
Comment on strengths and weaknesses of the instructor	Explained everything very well. Went very fast, I hard a background with calculus so it wasn't bad for me. I can imagine without having a background, I would be somewhat confused because the course material was presented really quickly.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie made sure than none of us were confused about the material and wasn’t reluctant to explain processes again if students were confused. She also made sure we had plenty of opportunities to improve our grade and sent out emails regularly to keep us up to date about office hours and any changes made.
Comment on strengths and weaknesses of the course	The course was paced appropriately to cover that amount of information in a single semester
--------	--------
Comment on strengths and weaknesses of the instructor	The professor was really helpful and her review exams were really consistent with the actual exams.
Comment on strengths and weaknesses of the course	The professor really helped us with various resources and the review exams were really helpful.
Give suggestions on how the course or how the instruction could be improved.	Less notes and more activities during class can be helpful.

--------	--------
Comment on strengths and weaknesses of the instructor	I think Professor Acitelli did a wonderful job explaining MA 121 to her students. Calculus obviously is far from everyone's favorite subject, but she did a great job providing us with resources to succeed if we as students used them properly.
Comment on strengths and weaknesses of the course	The room that it was in was kind of cramped and was always hot which was annoying sometimes, but the course itself made me much better at calculus.
Give suggestions on how the course or how the instruction could be improved.	Change the room that its in if possible.
--------	--------
Comment on strengths and weaknesses of the instructor	My instructor was extremely enthusiastic about the topic. The notes were very well done. And she was always eager to help out. I do not think I would change anything about the way the class was structured, however I feel like some of the material that we learned was easier in notes and much more complicated on the tests.
Comment on strengths and weaknesses of the course	Discourse was exactly what I expected it to be. There was no surprise on the rigor of the material Or what we were being tested on.
Give suggestions on how the course or how the instruction could be improved.	I think that this class was taught extremely well. The only thing I would change was have the students try more examples on their own in class rather than just the instructor solving them. I also think there should be more grades given rather than just the homework and the exams. Maybe some quizzes. It places a lot of pressure on each exam to only have them to rely on for your grade The only thing I would change was have the students try more examples on their own in class rather than just the instructor solving them. I also think there should be more grades given rather than just the homework and the exams. Maybe some quizzes. It place is a lot of pressure on each exam to only have them to rely on for your grade.
--------	--------
Comment on strengths and weaknesses of the instructor	The biggest strength was her enjoyment of math which allowed her to be more engaged with the class but her biggest weakness was that we was a little fast in her explanations and problems
Comment on strengths and weaknesses of the course	Strength of the course was that it builds a nice foundation for calculus but I don't think there was a real weakness besides for it being math which sucks.
--------	--------
Comment on strengths and weaknesses of the instructor	Math was my least favorite subject for all of middle and high school. I have never received an A in a math class until calc 121. I find class fun, interesting, and not that difficult.
--------	--------
Comment on strengths and weaknesses of the instructor	Fast paced class but overall some subject didn't have enough depth so I didn't really learn in class.
Comment on strengths and weaknesses of the course	Web assign is terrible.
Give suggestions on how the course or how the instruction could be improved.	I feel like I learned more on the day I missed classes and went into Moodle and got the notes online than I did in class, and that is not a good thing. I feel like I should have learned more in class than by myself but that didn't happen, but I still liked the course.

---	---
Comment on strengths and weaknesses of the instructor	The instructor was very efficient at explaining the course material and it was the first time in my LIFE I was able to understand math. If you would have told me a few years ago I would be able to understand math and help other students, I would have laughed in your face. But, I truly believe this instructor showed me to understand math.
Comment on strengths and weaknesses of the course	I enjoyed the PDF of noted being uploaded and the course being video taped, the only weakness of the course was WebAssign because it was it was very picky about answers. I liked having the review guides and formula sheets.
Give suggestions on how the course or how the instruction could be improved.	Nope, my instructor was amazing. :)
---	---
Comment on strengths and weaknesses of the instructor	Strength: Very nice teacher, gave many example questions on the topic, and very helpful. Weakness: Going through topics too fast, can barely catch up (understandable, since we dont have much time).
Comment on strengths and weaknesses of the course	Strengths: Not too hard, just have to memorize the formulas Weakness: No weaknesses
Give suggestions on how the course or how the instruction could be improved.	Everything is good.
---	---
Comment on strengths and weaknesses of the instructor	The instructor was passionate about the subject and enjoyed teaching the material. The instructor valued her students opinions and would frequently ask how we felt about things in class. The instructor did move at an extremely quick pace and sometimes it was hard to keep up.
Comment on strengths and weaknesses of the course	There were many useful resources that could be used to better understand course material. It's difficult to see how some topics could be applied in the real world.
Give suggestions on how the course or how the instruction could be improved.	The course moved at an extremely fast pace, it could be helpful if it went slightly slower for better comprehension.
---	---
Comment on strengths and weaknesses of the instructor	Speeds through the materials but posts the exact materials in class online with additional notes.
---	---
Comment on strengths and weaknesses of the instructor	She tried to make the class fun and relate it back to our majors. I appreciate the fact that she tried to give us as much partial credit on the tests as possible. She always tried to prepare us for what was on the tests. The only negative is that she goes over the notes so quickly. I never asked questions in that class because I was always a few problems behind.
Comment on strengths and weaknesses of the course	It was a lot of material and so much note taking but the homework was good practice and pretty reflective for what was on every test.
Give suggestions on how the course or how the instruction could be improved.	We didn't have a single quiz the entire semester and I feel like having them may have helped my grade because each test covered so much material that spanned out over weeks. A short quiz every so often may have helped students retain information.
---	---

Comment on strengths and weaknesses of the instructor	Teaching was good in lectures, they were just a little fast. Maybe a little bit more time to write the notes down so the material can be understood at the same time.
Comment on strengths and weaknesses of the course	Webassign was hard to work with at many times.
Give suggestions on how the course or how the instruction could be improved.	Everything was good besides the fast pace, but I understand a fast pace is required with the amount of material to cover.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli always kept the class engaged and informed through every lecture. I would not say that this teacher had any weaknesses in the class.
--------	--------
Comment on strengths and weaknesses of the instructor	One of the most flexible and considerate instructors I've met at NCSU. Catie cares about her students and wants everyone to enjoy and learn calculus. She is very easy to contact outside of class. Catie is willing to work with her students in time of crisis and put their well being first, above her class. I find that incredibly important and wish more professors were this considerate at State. I thoroughly enjoyed her class.
Comment on strengths and weaknesses of the course	I hate calculus and still enjoyed coming to Catie's class.
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths would be coming to class prepared and have open office hours and willing to help.
Comment on strengths and weaknesses of the course	Taught the material and provided many reviews that helped us prepare for our exams
Give suggestions on how the course or how the instruction could be improved.	The course can improve by not going fast when taking notes. I would write notes so I can catch up and I would not really understand the material. So I would have to review the notes after class
--------	--------
Comment on strengths and weaknesses of the instructor	She was very good at teaching and also breaking things down in office hours for better understanding.
Comment on strengths and weaknesses of the course	WebAssign absolutely sucks. There is no other truthful way to say it. However, the provided study material (practice tests and review guides) were VERY helpful.
Give suggestions on how the course or how the instruction could be improved.	The course and instructor were great. The only complaint I have is that the speed of teaching could be reduced slightly. Most times it was hard to copy stuff down and keep up, but also try to pay attention at the same time to comprehend what I was writing. (I understand that I am not a multi talker and this is a personal problem and that there is a certain amount of material that needs to be covered... This is just my $.02)
--------	--------
Comment on strengths and weaknesses of the instructor	strengths: very passionate, funny, made learning a subject many people were not passionate about enjoyable, always prepared, did lots of outside work for students, always had the students' best interest in mind!

Comment on strengths and weaknesses of the course	weakness: the only thing that was hard a bit intimidating at first was how fast we went over the review. Honestly though, looking back I understand why we went fast because we had lots of new material we had to cover. Strength: overall very effective course! It was definitely hard, but manageable.
--------	--------
Comment on strengths and weaknesses of the instructor	Always kept the class as entertaining as possible
Comment on strengths and weaknesses of the course	Webassign wasn't the best
--------	--------
Give suggestions on how the course or how the instruction could be improved.	Maybe allocate less time to the material at the beginning of the course and more time to the topics covered at the end.
--------	--------
Comment on strengths and weaknesses of the instructor	I think that the professor was really amazing and her teaching helped me learn a lot of difficult topics. I enjoyed when she loosened up in front of the class and showed her personality because it made the class a lot more enjoyable so I hope she continues to do that more often. I also think that she sometimes went really fast in class and I was a little lost but I am sure she went fast due to how much material there was to learn.
Comment on strengths and weaknesses of the course	I think that the course was overall really good. I felt like everything was pretty balanced and what we learned made sense and pertained to my real life which made it a lot easier to learn.
Give suggestions on how the course or how the instruction could be improved.	I think that the course and instructor were really good. I especially liked how kind the instructor constantly was and how she made it easy to approach her. I truly do not have any suggestions for improvement except for just slowing down while teaching but I am not too sure how much wiggle room there is there.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. A was great. In terms of personality she was always very sweet and brought a laugh. As a professor, she was extremely informative and engaging. Responded quickly to emails and always kept us in the loop. Provided materials were also fantastic and helped with content understanding a lot.
Comment on strengths and weaknesses of the course	Great curriculum. Moves fast and covers a lot but it isn't at all impossible. Material covered has real life applications that I believe will apply to my career.
Give suggestions on how the course or how the instruction could be improved.	Keep it the way it is now. Great pace that forces you to stay on track or get left in the dust.
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths- personable and overall explains the material well. Weaknesses- struggles to explain more difficult concepts with more steps.
Give suggestions on how the course or how the instruction could be improved.	More physical homework as webassign can be difficult to insert answers in to.
--------	--------

Comment on strengths and weaknesses of the instructor	I liked that before every chapter you went over what was exactly on the test. The reviews were helpful
Give suggestions on how the course or how the instruction could be improved.	AT first you wrote very fast which was hard to keep up with, but I got used to it. I know you have to get all the information in the course, but you could write a little slower especially in the beginning
--------	--------
Comment on strengths and weaknesses of the instructor	I really enjoyed her teaching style and I got a lot out of the lectures.
Give suggestions on how the course or how the instruction could be improved.	WebAssign is not helpful. It does not explain why something is wrong, like some other programs I have used, and there are some questions that are irrelevant to the course. I think there are better homework programs available that would be more helpful for students.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was a great math teacher who cared about her students and genuinely enjoys teaching math. I was able to follow along pretty well. I would advise her to slow down when writing sometimes, she writes faster than anyone I have ever seen.
Comment on strengths and weaknesses of the course	I liked this math class, it was difficult at times, but I always had good experiences with webassign and Catie gave us good notes.
Give suggestions on how the course or how the instruction could be improved.	Thank you Catie, I liked the enthusiasm you taught with!
--------	--------
Comment on strengths and weaknesses of the instructor	Though she sometimes moved a little fast, she did listen to us and hear our concerns when we didn't understand something. If everyone was struggling with something she'd be sure to go over and give us plenty of example problems to refer to. She gave us a lot of study materials for tests and made sure we had enough to be prepared if we wanted to.
Comment on strengths and weaknesses of the course	I really liked Ms. Catie and how she taught. I think her being a student made her very relatable and there were a few classes where she managed to make math enjoyable. She gave us thorough notes with plenty of example problems. One thing is that there were a lot of equations and sometimes those were difficult to manage and remember which ones to use when and where.
Give suggestions on how the course or how the instruction could be improved.	The only thing that would have made the course better for me is if we were able to have a notecard on more than just the final because I do think that it's difficult to keep track of all of the equations.
--------	--------
Comment on strengths and weaknesses of the instructor	This instructor had a lot of passion for her subject and treated her students with massive respect. She did everything to help her students and it was great!!
--------	--------
Comment on strengths and weaknesses of the instructor	One of the worst teachers of all time I would say.

Give suggestions on how the course or how the instruction could be improved.	Awful teacher. Doesn’t know how to effectively teach and instead just rushes through materials as students are left struggling to copy down whatever nonsense she puts on the board. Shouldn’t even have a job here.
--------	--------
Comment on strengths and weaknesses of the instructor	I know that many people believe that the instructor was going too fast most of the time. Personally, I thought the pace was fine and had to go at that pace because of our short amount of time. The instructor was very nice and answer any questions that were asked in the best possible way.
Comment on strengths and weaknesses of the course	I do like the way the questions on the test allowed you to get the most points possible rather than one simple mistake costing you the entire problem. Sometimes, I do not think the WebAssign went along with what was on the test at times but it wasn't bad.
Give suggestions on how the course or how the instruction could be improved.	Overall, I thought the course was great but the assignments could possibly be improved.
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths- Was always prepared and explained material well Weakness- None
Comment on strengths and weaknesses of the course	Strengths- course materials and resources were valuable learning aids Weakness- None
Give suggestions on how the course or how the instruction could be improved.	This course could be improved by sharing ways for students to receive tutoring outside the class.
--------	--------
Comment on strengths and weaknesses of the instructor	strengths: friendly, enthusiastic, easy to talk to weaknesses: writes very fast
Comment on strengths and weaknesses of the course	weaknesses: not a lot of time to do problems on your own to test your knowledge in class
--------	--------
Comment on strengths and weaknesses of the instructor	She was a great teacher and I really liked her.
Comment on strengths and weaknesses of the course	It was very hard to me, but I did learn a lot.
Give suggestions on how the course or how the instruction could be improved.	Maybe there should be more questions on the tests. When there are only 7 or 8 questions, missing just two results in a poor grade.
--------	--------
Comment on strengths and weaknesses of the instructor	This teacher was great all-around. I have no complaints about the teacher at all.
Comment on strengths and weaknesses of the course	The course is a good course. Needs to flow better.
Give suggestions on how the course or how the instruction could be improved.	Use more real-life examples in the course. Some of it is hard to mentally grasp because it is different than any other math class I've had.
--------	--------
Comment on strengths and weaknesses of the instructor	I really loved the way this class was taught with examples and easily understood explanations of the problems. We were taught everything we needed to know and were tested on it all.
Comment on strengths and weaknesses of the course	The course allows us to know what we needed to know.
Give suggestions on how the course or how the instruction could be improved.	No suggestions.

--------	--------
Comment on strengths and weaknesses of the instructor	overall great teacher 10/10 would take again, very helpful with study materials
Comment on strengths and weaknesses of the course	hard class but learned a lot
--------	--------
Give suggestions on how the course or how the instruction could be improved.	The material being learned was taught a bit fast and was hard to grasp in the beginning, after a while you get used to it though.
--------	--------
Comment on strengths and weaknesses of the instructor	This is the best calculus class I've ever taken. The subject has never been as clear to me as it was when she explained it. I can't find any weaknesses. This was, in my opinion, the perfect math class. She is such a good teacher. She's very clear and excited about what she does. I enjoyed learning from her.
Comment on strengths and weaknesses of the course	The worst thing about this class was the webassign being picky. The structure was perfect.
Give suggestions on how the course or how the instruction could be improved.	This was my favorite class this semester. I learned so much that I didn't think I could. I can now say that I love calculus. Seriously, this is an instructor to keep.
--------	--------
Comment on strengths and weaknesses of the instructor	She was honestly one of the best teacher experiences I have ever had. She was someone who obviously knew the material very well and was able to make it interesting while also keeping the room with an upbeat mood to the best of her ability.
Comment on strengths and weaknesses of the course	It's Calculus.
Give suggestions on how the course or how the instruction could be improved.	I don't know. Seemed pretty chill to me.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was funny and could help lighten the mood in class sometimes. I liked her teaching style and how she records her lectures and posts them, definitely the most helpful aid to my studying. The only thing bad I would say is she writes kind of fast and I would be concentrated on trying to copy the notes and keep up rather than grasping the concept, that's why it was nice that she posted the lecture so I could go back and look.
Comment on strengths and weaknesses of the course	Strengths: different approaches for some concepts so I could choose what worked best for me. Weaknesses: So much material on some of the tests.
Give suggestions on how the course or how the instruction could be improved.	Maybe just go a little slower during lectures and spread out material if possible.
--------	--------
Comment on strengths and weaknesses of the instructor	Very intelligent, but goes very fast through the material. Effective teacher and gives useful advice during office hours from what I have heard.
Comment on strengths and weaknesses of the course	WebAssign is garbage in inputs. The inputs are sometimes very wonky. The notes are effective from the lectures.
Give suggestions on how the course or how the instruction could be improved.	Lot of material to learn, but a lot of them goes hand in hand with each other.

---	---
Comment on strengths and weaknesses of the instructor	Goes to fast, does not explain in detail
---	---
Comment on strengths and weaknesses of the instructor	It was very apparent during all points of the course how passionate and willing to help students with the subject. Grades were always quick to get back, and the one time they weren't the situation was explained.
Comment on strengths and weaknesses of the course	There were some instances where what was on the homework for webassign did not match up with what we needed to study for Ms. A always added a review from another professor which was like the test that we would have (number of problems, and the type of problems) which was the best study tool I used.
Give suggestions on how the course or how the instruction could be improved.	Nothing- the webassigns are due at a reasonable time (11 pm on the night that the test is) and they aren't overwhelming or meant to be busy work.
---	---
Comment on strengths and weaknesses of the instructor	The instructor knew the material very well and for that reason could articulate it in a manner that students would also understand. The instructor showed us multiple ways to do the same problem so that students could pick which method worked best for them, not just the way the instructor preferred. The instructor was also very fair. What was on the study guide and covered in class was what was on the exam. The instructor was very well versed in the material and taught it in a manner that was easy to understand. Quite possibly one of the best math teachers I have ever had.
Comment on strengths and weaknesses of the course	Overall, I really enjoyed the course. I thought that the pace we were going at in the beginning was a little fast (but it was the review portion so it makes sense). I would make note of that in the beginning of class that this might seem a little fast, but this will not be the pace the whole time, as it can indicate students.
Give suggestions on how the course or how the instruction could be improved.	I think the course could be improved if there was more time for students to work the problems out in class. The instructor does a great job of giving us a variety of examples, but not enough time for students to work it out in class. I think it would be helpful to have the last few examples in each class be a try it on your own type. Overall I really liked this course and thought that the instructor was great. She did a lot to make sure that the students succeeded. If you put in effort on your end, I feel as though anyone could not only pass but excel.
---	---
Comment on strengths and weaknesses of the instructor	Strengths- having personality as a teacher that made a 250+ student class feel smaller and more connected while teaching the information effectively. Weaknesses- class was repetitive at times and could use a change up
Comment on strengths and weaknesses of the course	Class was effectively taught but felt too repetitive.
Give suggestions on how the course or how the instruction could be improved.	Change it up every once and awhile and and create more discussion between student and professor. Strongly encourage to ask questions because it’s hard to with such a big class
---	---

Comment on strengths and weaknesses of the instructor	The instructor was honestly a joy to be taught by, it was clear to me that she really does love math and teaching it and that helped me to learn the concepts better and then apply then to tests.
Comment on strengths and weaknesses of the course	Over all the course wasn’t too hard for me to grasp and the instructor made the course enjoyable for me to learn.
Give suggestions on how the course or how the instruction could be improved.	Maybe even more homework should be assigned to better understand and work with some of the concepts
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli loves mathematics, which is certainly a strength as a math teacher. She wants nothing but for her students to succeed and gives every opportunity for them to do so. As a teacher, she gives her students every chance possible to learn, and if they do not, it was most likely the students fault from failing to put in the time.
--------	--------
Comment on strengths and weaknesses of the instructor	you do a really good job of explaining exactly how to do something and different ways to do it so I always feel very prepared, and I like that you explain why you do a problem a certain way
Comment on strengths and weaknesses of the course	this course provides very helpful study materials that make me feel very prepared for tests and increase my overall understanding of th material
Give suggestions on how the course or how the instruction could be improved.	it would be helpful if you gave more time to copy down notes and then explained so we are not writing instead of listening to what you are saying

Note: 1. Results based on low response rates may not reflect the true class mean. Dept mean is for all undergraduate, or all graduate courses, offered by dept and is weighted by class size.

2. Results from cross-listed courses are included in the mean for the department whose course prefix appears first in the alphabet (e.g., for a course listed as HI and REL, the results are included in History's mean). To find the department mean for the other department (in this example, Philosophy and Religion), go to http://www2.acs.ncsu.edu/UPA/classeval/faculty/college_univ_means.htm .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Catie Acitelli -- Course: Calc Life Manag B
Term: 2019 Sum2	MA 231 001 Courses surveyed - MA 231 001
Question	**Response**
Comment on strengths and weaknesses of the instructor	She is probably one of the most productive and BEST professors I have ever had... and she is only a Grad student (though her teaching in HS has helped her a lot understand kids and how a class is run). She is always willing to work with you, doesn't make you feel dumb when you don;t understand, is always in office hours willing to help, and is very sweet and repeatable to things you have going on. Wish I took all my classes with her and not just my last one.
Comment on strengths and weaknesses of the course	WebAssign many time did not align with what she was teaching and sometimes made me more confused, other than that the material was taught in a great fashion. She color coated notes, always asked if we had any questions, was funny and made sarcastic funny comments to keep the class interesting. She makes the hard material of calculus be understood at a much easier level by not over complicating it and keeping it slow and always making sure to answer any questions we might have.
Give suggestions on how the course or how the instruction could be improved.	It can't. This was a class I was not looking forward to and yet, she made me realize that it isn't that bad and with the right teaching styles and organization you can better understand calculus. 10/10
--------	--------
Comment on strengths and weaknesses of the instructor	Very knowledgeable and passionate about the subject. Sometimes goes too fast and some cannot catch up.
Give suggestions on how the course or how the instruction could be improved.	Needs to go slower for harder chapters. More practice problems would be nice or in-class quizzes to help learn the material better in class.
--------	--------
Comment on strengths and weaknesses of the instructor	She is able to relate math to real life applications very well. Provided us more then enough examples of this in class.
Comment on strengths and weaknesses of the course	She was always prepared for any question and made math enjoyable. She offered many not just example problems but told us real like stories of how this math is used every day life.
Give suggestions on how the course or how the instruction could be improved.	I don’t think there is much to be improved upon on this summer class. I learned more than I did in Calc 1 in this class.
--------	--------
Comment on strengths and weaknesses of the instructor	Fantastic practice problems Gave fair exams
--------	--------
Comment on strengths and weaknesses of the instructor	Great instructor. However, and not a pressing issue, I think that she teaches too much like a high-school teacher, and not like a college professor. One example would be that she asks the class too many questions during class, ie, “10*4=?” I believe the class would go more smoothly, although it already does go smoothly, if this were not the case. All in all, she is a great instructor. Very thorough, very organized and helpful. She uploads her lecture notes to

	moodle, which is extremely helpful. She challenges students in a good way and strives to help them succeed. A+!
Comment on strengths and weaknesses of the course	The WebAssign questions are irrelevant, more than occasionally, to the exam material. I think that the WebAssign questions should be re- evaluated.
Give suggestions on how the course or how the instruction could be improved.	Great course, and a greater instructor. I will definitely recommend her to my friends if she teaches any classes in the future!
--------	--------
Comment on strengths and weaknesses of the instructor	Catie Acitelli is a very gifted and enthusiastic teacher. She was excellent at explaining the reasoning behind each mathematical process. Every time she taught a new topic, she was able to give step-by-step instructions to solve every problem within that topic. This made it very helpful for the students to look at a math problem and understand what the problem is asking and what they need to do to solve it. There were times when I felt that Ms. Acitelli went very fast when she was working through examples, but for the most part she gave thorough explanations for every step.
Comment on strengths and weaknesses of the course	I felt that for the most part, WebAssign was helpful for practicing the material. I have noticed that the problems in WebAssign are often structured differently than the problems on exams, so it sometimes felt like WebAssign problems were harder to figure out. I liked that the WebAssigns were due the night of each test instead of the night before each test. Since the homework questions were often so different from test questions, it didn't feel very helpful to work on them right before the test. I liked that I didn't have to worry about finding time to finish homework and study for a test on the same night.
Give suggestions on how the course or how the instruction could be improved.	I thought that overall, this course was excellent. The only way I think Ms. Acitelli could improve her instruction would be to slow down a little bit when going through examples. It would be helpful as well if the WebAssign questions were more similar to the questions that are in the textbook or in the class notes.
--------	--------
Comment on strengths and weaknesses of the instructor	She was very open from the very beginning of the course, giving us any information and any time outside of class that was necessary. Her teaching style was very effective and concise and she taught us exactly what we needed to learn. Her tests were straightforward and tested understanding of the material rather than abstract concepts. She was also responsive and understanding in communicating outside of class, including when I missed several successive days in a row. I don't really have any weaknesses from this course, I think she did an amazing job.
Comment on strengths and weaknesses of the course	Again, I saw no issues with the course and I think it went great.

Term: 2011 Fall	MA 131 413 Courses surveyed - MA 131
Question	**Response**
Comment on strengths and weaknesses of the instructor	She didn't really have many weaknesses. She was really effective at explaining the topics in more factual ways, whereas our instructor was more conceptual, which was confusing for me.
Comment on strengths and weaknesses of the course	Problem session helped loads.
Other comments	Awesome TA!
--------	--------
Comment on strengths and weaknesses of the instructor	Strength: she was a very good instructor Weakness: none
Comment on strengths and weaknesses of the course	Strength: helped with MA131 Weakness: none
Other comments	Best TA I've ever had in a while.
--------	--------
Comment on strengths and weaknesses of the instructor	She treated us as students and peers equally. She broke down concepts really well. At times, she seemed flustered.
Comment on strengths and weaknesses of the course	The course did a great job of reinforcing any concepts that I did not immediately pick up on in class.
--------	--------
Comment on strengths and weaknesses of the instructor	The best TA I have ever had. She was very helpful and wanted us to succeed. She went out of her way to help us out.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was extremely helpful during this course. She has been a wonderful teacher and very willing to help when you missed class due to being sick. She was never judgmental towards students and taught us little tricks to help us succeed.
Comment on strengths and weaknesses of the course	I originally thought the problem solving session was going to be a waste of time but it actually proved to be helpful and I enjoyed going every week.
--------	--------
Comment on strengths and weaknesses of the instructor	Honestly, if it weren't for you I would not have understood a word of what was taught in the class. Thank you so much.
--------	--------
Comment on strengths and weaknesses of the instructor	Strengths: since she was so young, I thought she related with the students very well. I did not always understand things in class and she cleared things up very well in recitation. She was an excellent TA and was very organized. I would not have to grade I have in calc if I wasn't in her recitation class. weakness: n/a

Comment on strengths and weaknesses of the course	strenghts: i recommend to still keep giving the reviews and practice test before test. those helped A LOT. I also recommend to keep reviewing for quizzes before you take them. weakness: I did not like, or learn too much when we worked in groups. I learned better when we just went over examples in class.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was an incredible TA! I can honestly say that one of the major reasons I had success in the course was because of her!
--------	--------
Comment on strengths and weaknesses of the instructor	She was excellent at preparing for tests. She knew the material really well and easily taught what needed to be known. She was very effective at answering any questions there were. Also, she makes good cookies.
Comment on strengths and weaknesses of the course	The quizzes gave a great taste of what the tests would look like.
Other comments	If attendance wasn't a grade, I would just go to the problem session.
--------	--------
Comment on strengths and weaknesses of the instructor	A lot of the times you gave me more points than I should have earned (on the quizzes and such) and I really appreciated it. I felt like you saw my effort, and it really helped out. I liked how you reexplainted the material we learned in class because I felt like I could understand it a lot more when it was coming from you. This class was extremely helpful.
--------	--------
Comment on strengths and weaknesses of the instructor	She always makes sure there aren't anymore questions before she goes on. She's excited about the material and is always in a good mood. She's always early to the problem session, so it's easy to get individual help from her if office hours conflict with class schedules.
--------	--------
Comment on strengths and weaknesses of the instructor	I love the fact that she loves math so much. She actually enjoyed teaching the course and helping students out, and was ALWAYS so helpful to everyone. I think sometimes she really went out of her way to help students out and to help them succeed which was awesome!
Comment on strengths and weaknesses of the course	The extra class we had on Thursdays was really helpful to me and for everyone else I talked to. It always helped to break things down that much more.
--------	--------
Comment on strengths and weaknesses of the instructor	Very confident and knew the subject well. Always prepared for class and was helpful in explaining subject matter to the students. Best problem session teacher.
--------	--------
Comment on strengths and weaknesses of the instructor	She was always excited about class, and I could tell she really cared about the students sitting in front of her. The sessions she taught were by far my favorite part of Calc this semester. As a student herself I could tell the course was an extra thing on her plate, but she handled everything extremely well.
Comment on strengths and weaknesses of the course	I feel this part of Calc 131 should stay a mandatory aspect of the class.
Other comments	I think Catie will make an excellent Math teacher on day.

Question	**Response**
Comment on strengths and weaknesses of the instructor	She is great! has helped me understand the material so much better! sometimes i think she should teach the class.
Comment on strengths and weaknesses of the course	Very helpful!
--------	--------
Comment on strengths and weaknesses of the instructor	Great at explaining material from class
Comment on strengths and weaknesses of the course	helped me a lot
--------	--------
Comment on strengths and weaknesses of the instructor	She was very friendly and she explained the math concepts well to our class.
--------	--------
Comment on strengths and weaknesses of the instructor	I loved having Catie as my TA. She was very knowledgable and patient. I feel like I learned more from Catie that I did from my professor.
--------	--------
Comment on strengths and weaknesses of the instructor	She is a very good TA. I learned the most through her recitation class than I did in the actual lecture class and I only had it once a week opposed from three days a week.
Comment on strengths and weaknesses of the course	The recitation helped tremendously.
--------	--------
Comment on strengths and weaknesses of the instructor	Ms. Acitelli was an excellent TA. She was very excited about math and made things very interesting. She was the reason I did so well on test and quizzes because she made things seem so much simplier and clear. I would love to have her as an actual math teacher for another course!
Comment on strengths and weaknesses of the course	Problem session was very helpful. It gave me the extra practice that I needed to grasp concepts and understand them.

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Acitelli,Catie -- Course: Calculus II
Term: 2011 Sprg	MA 241 231 Courses surveyed - MA 241
Question	**Response**
Comment on strengths and weaknesses of the instructor	Catie was always welcoming us to her office hours and extra review outside of class. It helped me out a lot and I would not have been as successful in this course if she had not gone out of her way to find time to work with us in smaller groups out of class.
Comment on strengths and weaknesses of the course	Basically was just a continuation from lecture, it made what we did in lecture much more clear.
Other comments	THANK YOU!
--------	--------
Comment on strengths and weaknesses of the instructor	Best TA I've had so far!
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was the best TA I have had at NC State. She legitimately cares about helping us and gave us so many helpful opportunities. She had countless review sessions, gave us practice tests, and explained anything we had questions on. Even going beyond just my section, she provided help session and practice tests for students in sessions with the other TA. Definitely one of the most helpful people I have come across during my time here.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie Acitelli has been the most helpful lab assistant or teacher assistant I have had during my learning experience at NC State. She is a great teacher and devotes her time to make sure the students learn the material they need to learn. I am proud to say that I may get an A+ in this course thanks to her teaching ability.
Comment on strengths and weaknesses of the course	Strong capable teachers that are very knowledgeable of the material and are eable to teach it to others.
Other comments	I hope Catie Acitelli continues to teach at NC State because she is a phenomenal teacher!!
--------	--------
Comment on strengths and weaknesses of the lab (if applicable)	Catie is freaking AWESOME! Our problem solving session was easily the only reason I have managed to make it this far in a course. Catie goes out of here way at all times to help every student with the course and even takes our successes and failures personally. Every characteristic she has shown in this lab is indicative of a person who will make a great teacher and be very successful in the field of math.
Other comments	Catie is the best.
--------	--------
Comment on strengths and weaknesses of the instructor	Great teacher. Maybe prepare a bit more for questions from the questions you assign.
--------	--------
Comment on strengths and weaknesses of the instructor	The instructor is knowledgable but perhaps too young so there was a lack of seriousness or professional.

Comment on strengths and weaknesses of the course	It was nice having the TA teach some classes to recieve the information in a different way and from a different person.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was the most helpful TA I have ever had in my entire career. She went out of her way to make sure her students understood the information and would succeed on the exams. She is a wonderful, intelligent, and friendly instructor who always secures a welcoming atmosphere into each learning environment. She also went out of her to provide her students with study materials and took that extra initiative to take care of her students. She also held review sessions while the other TA was too lazy to do so. Therefore, Catie is the best TA I have ever had and she will continue to impress people in any position she is placed in.
Comment on strengths and weaknesses of the course	The course was intellectually difficult but worth it.
--------	--------
Comment on strengths and weaknesses of the instructor	very knowledgeable and open to questions and additional help. provided extra review sessions when necessary
Comment on strengths and weaknesses of the lab (if applicable)	The lab was very useful in understanding the course and keeping up with the pace of the class.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was always prepared for class and help and explain material when we had questions.
Comment on strengths and weaknesses of the course	I liked the recitation period better in this calculus class then in calculus 1 we had eluminate once a week, which, didn't help at all.
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was legit and very god at explaining things. She also always went out of her way to make sure we were prepared for exams by setting up review sessions and preparing practice exams.
--------	--------
Comment on strengths and weaknesses of the instructor	She was very helpful. She assisted the students during and after the class. She helped us to make study guides and to prepare for test in a way that helped us fell comfortable with the test. The always had open hours and made herself readily available so that the students could get assistance.
--------	--------
Comment on strengths and weaknesses of the instructor	This instructor was very enthusiastic about the subject and was knowledgeble as well. She was not put in an environment that allowed her to do her best work in lab sections, however in offering study sessions before the tests she gave small group time for Q and A that contributed to those particpating learning a great deal.
Comment on strengths and weaknesses of the lab (if applicable)	The course was not well designed in that the section was still too large. A group of twenty at most would have made for a more productive study effort and contributed more to the success of the students involved.

18	Overall, the labs were effective learning experiences	5.0	4	0	0	0	0	4	0	0.0	0.00	4	.	.	.
19	The instructor established a welcoming learning environment for students from all populations.	4.9	6	1	0	0	0	1	0	0.4	0.14	7	.	.	.

Note: 1. Results based on low response rates may not reflect the true class mean. Dept mean is for all undergraduate, or all graduate courses, offered by dept and is weighted by class size.

2. Results from cross-listed courses are included in the mean for the department whose course prefix appears first in the alphabet (e.g., for a course listed as HI and REL, the results are included in History's mean). To find the department mean for the other department (in this example, Philosophy and Religion), go to http://www2.acs.ncsu.edu/UPA/classeval/faculty/college_univ_means.htm .

North Carolina State University - ClassEval Report	
Emplid: 000901062	Name: Acitelli,Catie -- Course: Calculus II
Term: 2011 Sprg	MA 241 233 Courses surveyed - MA 241
Question	**Response**
Comment on strengths and weaknesses of the instructor	-High knowledge of material -explains things very well
Other comments	Best TA Ive had ever
--------	--------
Comment on strengths and weaknesses of the instructor	She was awesome and put so much extra time into making practices tests and other problems for us to work on. She had no weaknesses!
Comment on strengths and weaknesses of the course	The course was really helpful to help us absorb the concepts
Comment on strengths and weaknesses of the lab (if applicable)	No weaknesses!
--------	--------
Comment on strengths and weaknesses of the instructor	Catie was a great teacher and was always there to help with any questions. She also made herself available outside of normal class times to help us.
--------	--------
Comment on strengths and weaknesses of the instructor	She is incredibly enthusiastic about teaching. I have never seen anyone get so excited about math. No one's perfect of course, but I can't think of any improvements off the top of my head.
